Catalogue of ITU publications

Dear Customer,

Thank you for your trust in ITU publications and for continuing to support our work as a leading international publisher of information and communication technology (ICT) reports and data.

Since our founding some 150 years ago, ITU has been sharing information about communication systems to people around the world. Today, our range of publications and global customer base continue to grow strongly, and we value your interest in our products.

ITU has a range of products that makes us unique in the publishing world. In this catalogue, you'll find titles on topics ranging from spectrum management and satellite communications to ICT statistics and policy and development reports. So whether you're a broadcast engineer, an ICT regulator, a computer systems specialist, a telecoms professional, a business analyst or a student of ICTs, you're sure to find something of interest.

Today, digital technologies are implicit and used in nearly every aspect of our lives and the economy, and ITU's activities, work and research are broadening. You'll find new titles on topics such as cybersecurity, e-health, using ICTs to combat climate change, the effective deployment of ICTs in emergency communications, next-generation technical standards, and much more.

Most ITU publications are now available in electronic format and can be purchased and downloaded directly from the **ITU Bookshop**. You can order publications in print or CD-ROM format online or use the order form included in this catalogue.

ITU publishes content in all six official UN languages – Arabic, Chinese, English, French, Russian and Spanish – and many (though not all) titles are available in multilingual versions. This catalogue also contains useful information on pricing discounts, methods of payment and related conditions of sale, as well as a list of whom to contact should you need additional support.

Keep up-to-date with ITU publications at www.itu.int/publications – our pages are updated regularly, with information on new publications posted as soon as they become available. You can also connect to the weekly update of this catalogue at www.itu.int/dms_pub/itu-s/opb/gen/S-GEN-CAT.OL-2020-PDF-E.pdf

Moreover, you may now also browse free ITU publications, events, news and partnership info by visiting our new platform, [MyITU](#).

As always, we welcome your feedback and comments. Please get in touch with us with any questions, queries or other feedback at sales@itu.int

Collection of the Basic Texts of the International Telecommunication Union adopted by the Plenipotentiary Conference

2003

A reference document containing: a) the Constitution and the Convention as amended by plenipotentiary conferences; b) General Rules of Conferences, Assemblies and Meetings of the Union; c) the full text of the Optional Protocol on the compulsory settlement of disputes relating to the Constitution, the Convention and the Administrative Regulations; d) the full text of all decisions, resolutions and recommendations in force; e) a list of abrogated decisions, resolutions and recommendations.

Overview About ITU

ITU is the United Nations specialized agency for information and communication technologies – ICTs.

We allocate global radio spectrum and satellite orbits, develop the technical standards that ensure networks and technologies seamlessly interconnect, and strive to improve access to ICTs to underserved communities worldwide.

ITU is committed to connecting the world. Through our work, we protect and support everyone's fundamental right to communicate.

Today, ICTs underpin everything we do. They help manage and control emergency services, water supplies, power networks and food distribution chains. They support health care, education, government services, financial markets, transportation systems, e-commerce platforms and environmental management. And they allow people to communicate with colleagues, friends and family anytime, and almost anywhere.

With the help of our global membership, ITU brings the benefits of modern communication technologies to people everywhere in an efficient, safe, easy and affordable manner.

We're unique among UN agencies in having both public and private sector membership. ITU's global membership includes **193 Member States** as well as some **900 companies, universities, and international and regional organizations.**

In an increasingly interconnected world, ITU is the single global organization embracing all players in this dynamic and fast-growing sector.

Every time you turn on your radio or television, hop on a plane, call home on your mobile phone, access the Internet or find your location with your smartphone, tablet or personal computer, every time you watch the weather forecast or explore the Earth through satellite images, you are using one of the vital services that the ITU is coordinating worldwide.

ITU's Radiocommunication Sector (ITU-R) is responsible for management of the radio-frequency spectrum and satellite orbit resources. With the relentless expansion of wireless services worldwide, all services relying on radiowaves are competing for a share of the radio-frequency spectrum to support new applications, growing user numbers and exploding traffic. The importance and relevance of ITU-R work is therefore increasing every day.

ITU standards (called Recommendations) are fundamental to the operation of today's advanced wireless, broadband and multimedia technologies. ITU's Telecommunication Standardization Sector (ITU-T) plays a crucial role in defining the core transport and access technologies that underpin communications networks around the world; an estimated 95 per cent of international communications traffic runs over optical transport networks built in conformance with ITU standards.

ITU-T releases over 300 standards each year covering everything from core network functionality to voice and video compression that allow systems to work and interoperate both locally and globally. If your product or service requires any kind of international buy-in, you need to be part of the standardization discussions in ITU's Telecommunication Standardization Sector (ITU-T).

Whether you are interested in entering or expanding your presence in emerging markets, demonstrating global ICT leadership, or learning how to put good policy into practice, in an increasingly networked world, expanding access to ICTs globally is in everybody's interest.

ITU's Telecommunication Development Sector (ITU-D) implements projects that make a difference in the lives of people around the world and offer sustainable and innovative solutions for achieving global development through ICTs. ITU-D also regularly publishes the industry's most comprehensive and reliable ICT statistics, and an annual overview of global regulatory trends in this fast-evolving sector.

Our vision Committed to connecting the world

Virtually every facet of modern life – from transport to entertainment and business, at work and at home – depends on ICTs.

The global telecommunication system is the largest and most sophisticated engineering feat ever created. You use communication systems every time you log on to the Internet, send an e-mail or SMS, consult satellite navigation systems, listen to the radio, watch television, travel by plane or ship – and of course, every time you use a mobile phone or computer.

Today, there are over eight billion mobile phone subscriptions and over five billion mobile phone subscribers with tens of millions of new Internet users every year. Hundreds of millions of people around the world use satellite services – whether getting directions from a satellite navigation system, checking the weather forecast, watching television, or surfing the web from remote and isolated areas. Millions more use ITU video compression standards every day via their mobile phones and cameras.

ITU is at the heart of the ICT sector, brokering agreement on technologies, services, and allocation of global resources like radio-frequency spectrum and satellite orbital frequencies, to create a seamless global communications system that's robust, reliable, and constantly evolving.

- ITU technical standards, protocols and international agreements are the essential elements underpinning the global communications system, including for fixed backhaul, mobile and satellite networks.
- ITU coordinates the world's satellites through the management of spectrum and orbital frequencies, which bring you television, vehicle GPS

navigation, maritime and aeronautical communications, weather information and online maps, and enable communications in even the most remote parts of the planet.

- Through optical transport and broadband access networks, the vast majority of Internet connections and voice calls are facilitated by ITU standards.
- ITU helps support communications in the wake of disasters and emergencies through on-the-ground assistance, dedicated emergency communications channels, technical standards for early-warning systems, and practical support for building disaster resilient telecommunications infrastructure.
- ITU collaborates closely with its Member States and industry to define the new technologies that will support tomorrow's networks and services (e.g. IMT-2020 or 5G networks and beyond, to 6G).
- ITU's work helps power the mobile revolution, forging the technical standards and policy frameworks that make mobile and broadband possible.
- ITU works with public and private sector partners to ensure that ICT access and services are affordable, equitable and universal.
- ITU empowers people around the world through technology education and training, and engages with members from academia to build networks and tap the power of tomorrow's innovators.

General Secretariat

The mission of the ITU General Secretariat is to provide high-quality and efficient services to the membership of the Union. The General Secretariat manages the administrative and financial aspects of the Union's activities, including the provision of conference services, planning and organization of major meetings, information services, security, strategic planning, and corporate functions such as communications, legal advice, finance, personnel, procurement, and internal audit.

The General Secretariat is the unit responsible for ongoing management of the activities around the World Summit on the Information Society (WSIS) process, including the annual WSIS Forum, and also manages activities in support of ITU Council and four-yearly Plenipotentiary Conferences.

Radiocommunication

Satellites enable phone calls, television and radio programmes, navigation and online maps. Space services are vital in monitoring and transmitting changes in such data as ocean temperature, vegetation patterns and greenhouse gases – helping us predict famines, the path of a hurricane, or how the global climate is changing. The explosive growth of wireless communications, and particularly wireless broadband, demonstrates the need for global solutions to address the need for additional radio spectrum allocations and harmonized standards to improve interoperability.

ITU's Radiocommunication Sector (ITU-R) coordinates this vast and growing range of radiocommunication services, as well as the international management of the radio-frequency spectrum and satellite orbital frequencies. An increasing number of players need to make use of these limited resources, and participating in ITU-R conferences and study group activities – where important work is done on mobile broadband communications and broadcasting technologies such as Ultra HDTV and 3D TV – is becoming an ever-higher priority for both governments and industry players.

Standardization

ITU standards (called Recommendations) are fundamental to the operation of today's advanced wireless, broadband and multimedia technologies. ITU's Telecommunication Standardization Sector (ITU-T) plays a crucial role in defining the core transport and access technologies that underpin communications networks around the world; an estimated 95 per cent of international communications traffic runs over optical transport networks built in conformance with ITU standards.

In a typical year, ITU will produce or revise upwards of 150 standards covering everything from core network functionality to voice and video compression that allow systems to work and interoperate both locally and globally. If your product or service requires any kind of international buy-in, you need to be part of the standardization discussions in ITU's Telecommunication Standardization Sector (ITU-T).

Development

Whether you are interested in entering or expanding your presence in emerging markets, demonstrating global ICT leadership, or learning how to put good policy into practice, in an increasingly networked world, expanding access to ICTs globally is in everybody's interest.

ITU's Telecommunication Development Sector (ITU-D) implements projects that make a difference in the lives of people around the world and offer sustainable and innovative solutions for achieving global development through ICTs. ITU-D also regularly publishes the industry's most comprehensive and reliable ICT statistics, and an annual overview of global regulatory trends in this fast-evolving sector.

Why be a part of ITU?

The ICT industry is undergoing rapid change. Strategic cooperation and understanding between all stakeholders are vital when decisions can have huge political, social and financial consequences.

ITU offers a unique, neutral, global platform to come together and:

- share ideas and knowledge, and exchange best practice
- agree on global technical standards in a consensus-based and transparent environment
- engage directly with governments, regulators and industry leaders
- establish fruitful partnerships
- influence the shape of your industry
- ensure that your products are safe, reliable, globally compatible and future-proof
- benefit from the world's most comprehensive, reliable ICT statistics
- gain access to top-level ICT publications
- plug into local knowledge through ITU's extensive network of regional and area offices.

Global meeting place

ITU regularly hosts global and regional events and workshops that are open to members and sometimes also to non-members. Considered by many as the global gathering place for the ICT sector, ITU is famous for events like the WSIS Forum, AI for Good Summit, ITU Digital World, which bring together the most influential representatives of government and industry to exchange ideas and knowledge for the benefit of all. Digital World is a key platform for helping countries develop and nurture new local, regional and international business opportunities.

By connecting the world and fulfilling everyone's fundamental right to communicate, we strive to make the world a better and safer place.

Developing skills and knowledge

'Connecting the unconnected' is not just a question of putting infrastructure in place. Networks need to be supported by effective regulatory strategies and policies and an understanding of future trends: technical, social and economic. ITU brings partners together to discuss these issues, share insights and best practice, and lay the groundwork for long-term industry growth. ITU publishes regular reports highlighting important developments and also has its own ITU Academy programme, which trains technicians, regulators, administrators and local communities in how best to harness the power of ICTs.

1.1 General

Guidelines for Industry on Child Online Protection

2020

The guidelines for industry aim at supporting industry players in the development of their internal COP policies. They highlight key areas, such as integrating child rights considerations into all appropriate corporate policies and management processes; developing standard processes to handle child sexual abuse material; creating a safer and age-appropriate online environment; educating children, carers and educators about children's safety and the responsible use of information and communication technologies (ICTs); and promoting digital technology as a mode for increasing civic engagement.

United Nations Activities on Artificial Intelligence (AI) 2019

A joint-effort between ITU and over 35 other UN agencies and bodies, and all partners of 2019's AI for Good Global Summit, this report provides information about the diverse and innovative activities related to artificial intelligence (AI) across the UN system to meet many of our world's increasingly urgent challenges, from responding to humanitarian crises to tackling climate change. Free of charge.

United Nations Activities on Artificial Intelligence (AI)

A joint-effort between ITU and 32 UN agencies and bodies, all partners of 2018's AI for Good Global Summit, this report provides information about the diverse and innovative activities related to artificial intelligence (AI) across the UN system. It outlines how AI is being used to fight hunger, mitigate climate change, or advance health for all and we see how UN agencies experiment with AI to improve response to disease outbreaks, monitor energy use in real-time, and facilitate the transition to smart sustainable cities.

Moby and the story of the telephone

2009

This book tells the story of the telephone and its technology, from ancient times to the present day. It explains the basic physical principles in simple terms, and is intended for anyone of high-school age or older curious to understand how this everyday object works.... A mobile phone belonging to one of the sales staff gets locked up in the shop, giving it the perfect opportunity to tell the latest batch of phones their own STORY - the history of the telephone!

1865 Paris: The Birth of the Union

2015

On 17 May 1865, after two-and-a-half months of negotiations, the first real International Telegraph Convention was signed in Paris by its 20 founding members, thus creating the International Telegraph Union (predecessor of ITU). This first international convention provided a framework to standardize telegraphy equipment, set uniform operating instructions and laid down common international tariff and accounting rules. This publication describes the environment that led to the founding of ITU in 1865 and provides a fascinating look at the world of communications technologies 150 years ago and how many of the challenges that led to its creation remain today.

The ICT Opportunity for a Disability-Inclusive Development Framework
2013

This publication contributes to a better understanding of the extent to which ICTs can enable and accelerate the social and economic inclusion of persons with disabilities. It lists challenges that are still to be addressed while outlining concrete actions to be undertaken by each group of stakeholders and a set of indicators to help measure progress towards the achievement of a disability-inclusive post-2015 development agenda and framework. The report is the result of collaborative input from the UN Broadband Commission for Digital Development, the Global Initiative for Inclusive ICTs, the International Disability Alliance, ITU, Microsoft, the Telecentre.org Foundation and UNESCO. For more information, please visit www.itu.int/accessibility.

The Quest for Cyber Confidence
2014

This book addresses the increasingly daunting task of building confidence in the use of cyber platforms and technologies against a backdrop of recent high-profile security breach incidents and a plethora of emerging threats that have shaken trust in these essential tools of our time. It follows publication of *The Quest for Cyber Peace* in 2009, which focuses on the promotion of cyber peace in a sphere which has generated tremendous benefits and progress to mankind, but also spawned widespread criminal activities and created new avenues for intelligence gathering, industrial espionage, and conflict. Necessarily, this volume returns to these issues revolving around the overriding theme of the use of the cyber domain as a potent force for either good or evil, especially the impact of the 'dark' Internet on trust in the cyber dimension. Here, however, its central theme promotes the concept of cyber confidence.

Final Acts of the World Conference on International Telecommunications (WCIT-12)

Dubai, 2012

The International Telecommunication Regulations (ITRs) will serve as the binding global treaty designed to facilitate international interconnection and interoperability of information and communication services, as well as ensuring their efficiency and widespread public usefulness and availability. The treaty sets out general principles for assuring the free flow of information around the world, promoting affordable and equitable access for all and laying the foundation for ongoing innovation and market growth.

1.3 Policy and Market Analysis

Publications under ITU New Initiatives Programme

The ITU New Initiatives Programme: Regulatory Environment for Future Mobile Multimedia Services

2006

The mobile communications field continues to grow rapidly, as more and more 3G/IMT-2000 networks are deployed. The increasingly intimate nature of the mobile phone and its use as a key platform for content delivery raises important regulatory concerns. Convergence between the broadcasting and telecommunication industries is cited as one of the key challenges that both regulators and industry will have to face in the coming years. The research presented in this publication made up the background materials for discussion at the ITU New Initiatives Programme Workshop on "The Regulatory Environment for Future Mobile Multimedia Services" held in Mainz, Germany, from 21 to 23 June 2006, jointly hosted by ITU and the Federal Network Agency of Germany.

The ITU New Initiatives Programme: Ubiquitous Network Societies

2005

This publication summarizes the materials and conclusion of a workshop held by ITU from 6 to 8 April 2005, organized by the Strategy and Policy Unit (SPU). This workshop served as a forum for policy-makers, regulators, mobile operators, content providers, industry players, consultants, academics and sociologists to exchange information, experiences and visions relating to future ubiquitous network societies. Topics covered include the impact of ubiquitous technologies on the traditional telecommunication industry, the role and application of RFID, privacy and public policy issues. Country case studies on Italy, Japan, Korea and Singapore are also featured.

The ITU New Initiatives Programme: Shaping the Future Mobile Information Society

2004

This publication contains the materials and conclusions of a recent ITU workshop on Shaping the Future Mobile Information Society held in Seoul, Republic of Korea, with the generous support and collaboration of the Korean Ministry of Information and Communications (MIC), and the International Cooperation Agency for Korea IT. Topics covered included social and human considerations for a more mobile world, broadband mobile communications towards a converged world, and mobile phones and youth.

The ITU New Initiatives Programme: Radio Spectrum Management for a Converging World

2004

This publication contains the materials and conclusions of a recent ITU workshop organized jointly between the Strategy and Policy Unit (SPU) and the Radiocommunication Bureau (BR). This workshop served as a forum for policy-makers and regulators, wireless user groups, experts and industry players involved in spectrum management. Issues related to the unlicensed portions of the radio spectrum and experiences of individual countries are also included in the publication.

Shaping Tomorrow's Networks

Market Mechanisms for Spectrum Management

2007

This brochure summarizes the results of a workshop on Market Mechanisms for Spectrum Management held in Geneva, Switzerland, from 22 to 23 January 2007. It was prepared by the Strategy and Policy Unit (SPU) on the basis of specially prepared background papers, case studies, input documents and contributions to the workshop. The enclosed CD-ROM contains the background materials and documents of the workshop, as well as a wide range of background resources related to spectrum management.

Tomorrow's Networks Today

2005

"This report aims to highlight the most important issues and concerns raised during presentations and open discussions. It intends also to provide a concise overview of the benefits and drawbacks of a possible migration towards tomorrow's networks." This brochure summarizes the results of a workshop on Tomorrow's Networks Today, held in Saint Vincent (Aosta), Italy from 7 to 8 October 2005. It was prepared by the Strategy and Policy Unit (SPU) on the basis of specially prepared case studies, input documents and contributions to the workshop. The CD-Rom contains the background materials and documents of the workshop as well as a wide range of background resources related to tomorrow's networks.

Broadband Commission

The State of Broadband 2020: Tackling digital inequalities - A decade for action

2020

The world in 2020 is in a state of flux. While much progress has been made globally over the past ten years in expanding access to, and adoption of, broadband infrastructure and services, significant challenges remain in tackling digital inequalities, addressing the current widespread impacts of the COVID-19 pandemic, and in accelerating efforts towards achieving the Sustainable Development Goals (SDGs) by 2030. This newly released ITU publication is also available for free download via MyITU, where other titles with similar themes may be searched and accessed.

The State of Broadband 2016: Broadband catalyzing sustainable development

2016

This report provides an update on progress towards the global targets of the ITU/UN-ESCO Broadband Commission for Sustainable Development and showcases the research and thought leadership of the Broadband Commission. It also provides a global snapshot of where the telecommunication/ICT industry stands with regards to fixed and mobile broadband deployment, affordability and usage, as well as the use of broadband for achieving development objectives. It will examine the use of new and upcoming technologies, such as 5G and the Internet of Things (IoT) for development.

The State of Broadband 2015
2015

Every year, the ITU/UNESCO Broadband Commission for Digital Development publishes its 'State of Broadband' report to take the pulse of the global broadband industry and explore progress in broadband connectivity. This report provides a global snapshot of where the telecommunications/ICT industry stands with regards to fixed and mobile broadband deployment, affordability and usage, as well as the use of broadband for achieving development objectives, including the Millennium Development Goals (MDGs) and Sustainable Development Goals (SDGs). It evaluates the take-up and development of broadband around the world, and tracks the Broadband Commission's targets. It draws on the thought leadership of the Commission and its research into National Broadband Plans. It also offers a range of perspectives on how to boost the roll-out and adoption of broadband networks and services across developing countries.

Publications in the context of the World Summit on the Information Society (WSIS)

WSIS Stocktaking: Success Stories 2018
2018

Each year, on the occasion of the WSIS Forum, 18 WSIS stakeholders are awarded WSIS Prizes, as a unique mark of global recognition for excellence in the implementation of WSIS outcomes. To this end, 18 projects are selected as the most successful stories worldwide, under each category, to serve as best-practice models to be replicated by other stakeholders interested in information and communication technologies (ICTs) for development.

World Information Society Report 2007: Beyond WSIS

2007

The second edition of the World Information Society Report, published by ITU and UNCTAD, looks beyond WSIS to the creation of an inclusive, people-centred and development-oriented Information Society, open to all. The opening chapter looks at the challenges of measuring the ICT sector while chapter two examines progress in bridging the digital divide. Chapter three focuses on emerging trends in the information society worldwide and chapter four looks at national ICT strategies. Chapter five considers the threats to cybersecurity, while chapter six provides an update on WSIS implementation and presents a number of ICT success stories across the world. When purchased, the report is accompanied by a series of tables providing the latest statistics on the development of ICTs worldwide.

World Information Society Report 2006

2006

The second edition of the World Information Society Report: Beyond WSIS, published by ITU and UNCTAD, looks beyond the World Summit on the Information Society (WSIS, Geneva 2003 - Tunis 2005) to the creation of an inclusive, people-centred and development-oriented Information Society, open to all. The report tracks progress in digital opportunity for 181 economies over the past few years since the start of the WSIS process and is accompanied by a series of tables providing the latest statistics on the development of Information and Communication Technologies (ICTs) worldwide. The report has been created by the "Digital Opportunity Platform", an open multi-stakeholder platform with contributions from governments, private sector, academics and civil society, as well as inter-governmental organisations.

ITU WSIS Thematic Meeting: Building Digital Bridges

2005

This report looks at efforts by stakeholders at the local, national and international level to bridge the digital divide. It reviews the role of new technologies, multi-stakeholder partnerships and ICT indices in reducing the gap, taking an in-depth look at the cases of Australia, Hong Kong, India, Korea (Rep. of) and Malaysia. The report also proposes a methodology for the development of a composite Digital Opportunity Index (DOI).

ITU WSIS Thematic Meeting: Countering Spam

2004

This publication presents the materials and conclusions of a thematic meeting on 'Countering Spam' held by ITU from 7 to 9 July 2004, and forms part of the ITU New Initiatives Programme series. Among other things, the contributions delivered by the participants looked at the problem of finding a common approach to spam, and analyse issues ranging from technical solutions, different legislative approaches and international cooperation among different stakeholders. Also looked at is the problem of consumer awareness and education.

Visions of the Information Society

2003

This book is aimed at presenting the major questions and challenges facing most societies in today's world. While we have endeavoured to present the themes at a level that is widely accessible, we hope that the high level of expertise makes this publication a useful contribution to people from all fields of specialization wishing to gain better insights into the benefits, challenges and risks of our information societies today and in the future. The spectacular development of information and communication technologies (ICT) has radically affected the way in which humans work, dialogue with each other, and go about their daily lives. It has transformed the global economy, heralding a new and dynamic "information society". But what are the real implications of the transformation? Greater security risks? Access to information for everyone, everywhere? This publication, consisting of a book containing expert analyses of different areas and a CD-ROM containing extensive background resources, electronic versions of studies and web references, provides a global reflection on the information society. The authors are renowned experts in their respective fields, and include leading academics and consultants of international repute. The major themes covered are: the perspectives of industrialized and developing countries; network security; ICTs for education; and rights management.

1.4 ITU Journal: ICT Discoveries

Issues

Special issue 1 - Propagation modelling for advanced future radio systems - Challenges for a congested radio spectrum

This special issue of the ITU Journal: ICT Discoveries considers the wide range of radio wave propagation phenomena and their effect on radiocommunication systems performance, availability and reliability. This publication explores the latest developments concerning propagation modelling and the phenomena relevant to the planning and deployment of advanced future radiocommunication systems and the efficient use of the radio spectrum.

Special Issue 2 - Data for good

The second special issue of the ITU Journal: ICT Discoveries presents academic papers that offer insight into the increasing sophistication of techniques used to exchange and understand data, while also exploring how data can safely fuel more autonomous, human centric information and communication technologies. Given the interdisciplinary nature of the issue, it features contributions that add a deeper dimension to the discussion by looking at the policy, regulatory and ethical aspects involved in the increasing use of data today.

Article 7 - Analytic models for bi-static scattering from a randomly rough surface with complex relative permittivity

This study provides explicit mathematical formulations for the bi-static scattering coefficient from a randomly rough surface with a complex relative permittivity based on the following analytic models: Small perturbation model (SPM), Physical optics model (PO), and Kirchhoff approximation model (KA). Then it addresses the two shortcomings associated with each of the three models: i) limited applicability domain, and ii) null predicted values for the cross-polarized bi-static scattering coefficients within plane of incidence. The plane of incidence contains both backscattering direction and forward (specular reflection) direction which are of interest to the spectrum community.

1.5 ITU Journal - Future and evolving technologies

Articles

Article 9 - 6G vision: An ultra-flexible perspective

The upcoming sixth generation (6G) communications systems are expected to support an unprecedented variety of applications, pervading every aspect of human life. It is clearly not possible to fulfill the service requirements without actualizing a plethora of flexible options pertaining to the key enabler technologies themselves. At that point, this work presents an overview of the potential 6G key enablers from the flexibility perspective, categorizes them, and provides a general framework to incorporate them in the future networks. Furthermore, the role of artificial intelligence and integrated sensing and communications as key enablers of the presented framework is also discussed.

Convention Radiotélégraphique internationale

Commemorative 110th Anniversary Edition

This is a commemorative reproduction of the first edition of the International Radio Telegraph Convention, issued on the occasion of the 110th anniversary of the ITU Radio Regulations in 2016. The Convention recognized the importance of radio for the safety-of-life at sea and adopted a distinctive distress signal: SOS. It was signed in Berlin in 1906, at which time the Final Protocol, Service Regulations, and the Additional Agreement providing for obligatory intercommunication between ships without distinction as to the system used were also approved.

2.2 Regulatory Publications

The legal framework of ITU comprises the basic instruments of the Union, which have treaty status and are binding on ITU Member States. These instruments are the Constitution and Convention of the International Telecommunication Union and the Administrative Regulations, which complement the Constitution and the Convention.

Radio Regulations

2020

The Radio Regulations, Edition of 2020, contains the complete texts of the Radio Regulations adopted by the World Radiocommunication Conference of 1995 (WRC-95) and reviewed by the subsequent World Radiocommunication Conferences: WRC-97 (Geneva, 1997), WRC-2000 (Istanbul, 2000), WRC-03 (Geneva, 2003), WRC-07 (Geneva, 2007), WRC-12 (Geneva, 2012), WRC-15 (Geneva, 2015) and WRC-19 (Sharm el-Sheik, 2019). As per a 2013 Council decision, the pdf versions, not qualifying as carriage requirements, are now posted free of charge for personal use and can be accessed either below, directly, or via MyITU. Orders for hard-copies or DVDs, both now available, can be made below with free world-wide delivery.

Radio Regulations

2016

The Radio Regulations, edition of 2016, contains the complete texts of the Radio Regulations as adopted by the World Radiocommunication Conference (Geneva, 1995) (WRC-95), subsequently revised and approved by the World Radiocommunication Conference (Geneva, 1997) (WRC-97), the World Radiocommunication Conference (Istanbul, 2000) (WRC-2000), the World Radiocommunication Conference (Geneva, 2003) (WRC-03), the World Radiocommunication Conference (Geneva, 2007) (WRC-07), the World Radiocommunication Conference (Geneva, 2012) (WRC-12) and the World Radiocommunication Conference (Geneva, 2015) (WRC-15), including all Appendices, Resolutions, Recommendations and ITU-R Recommendations incorporated by reference. Next edition: Sept/Oct 2020.

2.3 Conference Publications

The Final Acts record the decisions taken at World Radiocommunication Conferences or Regional Radiocommunication Conferences. They include the new and revised provisions of the Radio Regulations and associated Appendices, as well as the new and revised Resolutions and Recommendations adopted by the Conference. The Final Acts of Regional Conferences normally contain Regional Agreements and Plans annexed to these Agreements.

World Radiocommunication Conferences

Final Acts WRC-19

2019

The Final Acts WRC-19 constitute a record of the decisions taken at the World Radiocommunication Conference 2019 (WRC-19) that comprises both the new and revised provisions of the Radio Regulations, including all Appendices, and the new and revised Resolutions and Recommendations approved by the Conference. Statements made by Member States at the time of signing the Final Acts are also included. Availability: 31 March 2020. Soft copies are free of charge; hard copies available to order.

Final Acts of the Regional Radiocommunication Conference for planning of the digital terrestrial broadcasting service in parts of Regions 1 and 3, in the frequency bands 174-230 MHz and 470-862 MHz (RRC-06)

2006

The Final Acts of RRC-06 contain the Regional Agreement GE06, adopted by RRC-06, which governs the use of frequencies by the broadcasting service and other primary terrestrial services in the frequency bands 174-230 MHz and 470-862 MHz. They also contain frequency assignment and frequency allotment plans for the digital broadcasting service (television and sound), the analogue television plan applicable in the transition period, the coordinated list of assignments to other terrestrial primary services in these bands, and the Resolutions adopted by RRC-06. The GE06 Agreement is provisionally applicable as from 17 June 2006. (Note: Only the freely available Table of Contents is downloadable).

Report of the CPM to WRC-12

2011

This CPM Report to the 2012 World Radiocommunication Conference (WRC-12) was prepared in response to Resolution 1291 (MOD) of the ITU Council to assist those who will be involved in the preparations for and deliberations at WRC-12. It was prepared and approved by the Conference Preparatory Meeting (CPM) at its Second Session in Geneva, 14-25 February 2011. This Report is structured to follow the topics of the WRC-12 Agenda and comprises six Chapters and one Annex. Price below includes Paper/CD packaged together. Not sold separately.

Report of the CPM to the WRC-19 2019

The CPM Report to the 2019 World Radiocommunication Conference (WRC-19) was prepared in response to ITU Council Resolution 1380 (C16, Amended C17), to assist those involved in the preparations of WRC-19. This Report, prepared and approved by the Conference Preparatory Meeting (CPM) at its Second Session in Geneva (18 to 28 February 2019), represents the best information on technical, operational and regulatory/procedural issues relevant to the WRC-19 Agenda available at the time of its preparation and should provide a good basis for the discussions at the Conference. To read more about CPM 2019, please see ITU-R's information pages

2.4 Service Publications

ITU-R Handbooks constitute an authoritative source of technical material relating to radiocommunications that disseminates information in a form that is readily understandable and that can be applied practically, especially in the training of technicians and engineers, while paying special attention to the requirements of developing countries.

Maritime Publications

List V - List of Ship Stations and Maritime Mobile Service Identity Assignments

2020

The List of Ship Stations and Maritime Mobile Service Identity Assignments (List V) is a service publication prepared and issued, once a year, by the International Telecommunication Union (ITU), in accordance with provision no. 20.8 of the Radio Regulations (RR). As stipulated in Appendix 16 to the RR, this List shall be provided to all ship stations for which a Global Maritime Distress and Safety System (GMDSS) installation is required by international agreement. Now available as of mid-June 2020, with potential delivery delays due to Covid-19 measures. Note: This title exists in CD format only, no book/hard-copy format. End-users should register their official CD by scanning their unique QR code. New 2021 edition: April 2021.

List IV - List of Coast Stations and Special Service Stations

2019

List IV contains important information for the mariner in relation to radiocommunications, including the GMDSS (Global Maritime Distress and Safety System). Detailed information such as the frequencies for transmitting and receiving, in addition to geographical coordinates, is provided for maritime coast radio stations, including those assuming watch-keeping using digital selective calling (DSC) techniques and radiotelephony. List IV also supplies details of additional services such as medical advice, navigational and meteorological warnings, MSI (Maritime Safety Information), AIS (Automatic Identification System), meteorological bulletins and radio time signals, along with the hours of service and operational frequencies, information on port stations, pilot stations, coast Earth stations, VTS stations, contact information of RCC (Rescue Coordination Centers), SAR agencies, Navarea coordinators and AtoNs (AIS Aids to Navigation). As stipulated in Appendix 16 to the RR, this List shall be provided to all ship stations for which a Global Maritime Distress and Safety System (GMDSS) installation is required by international agreement. Now available. Note: This title exists in CD format only, no book/hard-copy format. End-users should register their official CD by scanning their unique QR code. Next edition: November 2021.

Manual for Use by the Maritime Mobile and Maritime Mobile-Satellite Services (Maritime Manual)

2020

The Manual for Use by the Maritime Mobile and Maritime Mobile-Satellite Services is published in accordance with Article 20 (No. 20.14) of the Radio Regulations and results from studies carried out in the ITU-R since 2008. Volume 1 provides descriptive text of the organization and operation of the GMDSS and other maritime operational procedures, while Volume 2 contains the extracts of the regulatory texts associated with maritime operations. 2020 edition now available in CD format, exceptionally without the ITU hologram. Each purchased copy should be registered by the end-user by scanning the QR code on the back cover. Paper edition, as from end-February 2021.

2.5 ITU-R Recommendations

ITU-R Recommendations constitute a set of international technical standards developed by the Radiocommunication Sector (formerly CCIR) of the ITU. They are the result of studies undertaken by Radiocommunication Study Groups on:

- the use of a vast range of wireless services, including popular new mobile communication technologies;
- the management of the radio-frequency spectrum and satellite orbits;
- the efficient use of the radio-frequency spectrum by all radiocommunication services;
- terrestrial and satellite radiocommunication broadcasting;
- radiowave propagation;
- systems and networks for the fixed-satellite service, for the fixed service and the mobile service;
- space operation, Earth exploration-satellite, meteorological-satellite and radio astronomy services.

ITU-R Recommendations are approved by ITU Member States. Their implementation is not mandatory; however, as they are developed by experts from administrations, operators, the industry and other organizations dealing with radiocommunication matters from all over the world, they enjoy a high reputation and are implemented worldwide.

(*Free online access to current ITU-R Recommendations is provided on a trial basis to ITU Member States administrations, Sector Members and Associates of all Sectors via TIES until further notice.)

They are divided into Series according to the subjects they cover, as follows:

<i>Series</i>	<i>Subject area</i>
BO	Satellite delivery
BR	Recording for production, archival and play-out; film for television
BS	Broadcasting service (sound)
BT	Broadcasting service (television)
F	Fixed service
M	Mobile, radiodetermination, amateur and related satellite services
P	Radiowave propagation
RA	Radio astronomy
RS	Remote sensing systems
S	Fixed-satellite service
SA	Space applications and meteorology
SF	Frequency sharing and coordination between fixed-satellite and fixed service systems
SM	Spectrum management

<i>Series</i>	<i>Subject area</i>
SNG	Satellite news gathering
TF	Time signals and frequency standards emissions
V	Vocabulary and related subjects

ITU-R Recommendations and Reports -DVD-ROM

2016

ITU-R Recommendations constitute a set of international technical standards developed by the Radiocommunication Sector of ITU on topics such as efficient management and use of the spectrum/orbit resource, radio systems characteristics and performance, spectrum monitoring and emergency radiocommunications for public protection and disaster relief. ITU-R Reports contain technical, operational or procedural statements prepared by radiocommunication study groups. ITU-R Handbooks provide a statement of the current knowledge, the present position of studies, or of good operating or technical practice, in certain aspects of radiocommunications.

2.6 Handbooks

ITU-R Handbooks constitute an authoritative source of technical material relating to radiocommunications that disseminates information in a form that is readily understandable and that can be applied practically, especially in the training of technicians and engineers, while paying special attention to the requirements of developing countries.

Spectrum management

Spectrum Monitoring

2011

The Handbook on Spectrum Monitoring contains the latest information on all aspects of monitoring and represents a valuable reference manual for the spectrum management community. It is intended for the use by administrations of both developing and developed countries and by the Radiocommunication Bureau. The Handbook will also be useful to radiocommunication engineers everywhere.

Supplement to Handbook on Spectrum Monitoring

2008

The purpose of this Supplement to the ITU-R Handbook - Spectrum Monitoring (Edition 2002) is to provide up-to-date information on several issues before the publication of the next complete edition of the Handbook. It provides a complete and self-contained revision of the following chapters of the Handbook: - Chapter 3 (Monitoring equipment and automation of monitoring operations), - Section 5.1 (Spacecraft emission monitoring) of Chapter 5, and - Annex 1 (Monitoring system planning and tenders).

Spectrum Management

Computer-aided Techniques for Spectrum Management (CAT)

2015

This Handbook should be seen as complementary to Handbooks 'National Spectrum Management' (2015) and 'Spectrum Monitoring' (2011). The topic of national spectrum management has evolved and become the central hot spot in the activities of all telecommunication administrations. This is particularly true for developing countries, where the dramatic development of ICT technologies and their wide application have led to a heavy increase in related spectrum usage. The user/reader will find basic material and numerous models for developing efficient projects that will assist in reaching their objective ? implementing automated spectrum management as soon as possible.

Radiowave Propagation

ITU-R propagation prediction methods for interference and sharing studies

2012

This Handbook provides technical information and guidance needed for sharing studies and interference assessments using selected ITU-R P-Series RF propagation models and prediction methods. The handbook is intended to be used in conjunction with ITU-R P-Series Recommendations to assist in performing interference analyses and prediction methods on radiocommunication service systems.

Ionosphere and its Effects on Radiowave Propagation

1998

This Handbook supplements information on radiowave propagation in and through the ionosphere which is addressed in related Recommendations contained in the P Series of ITU-R Recommendations. In this respect, the Handbook is intended to help the user in the application of these Recommendations in the design and operation of radiocommunication systems using, or influenced by, the ionosphere. English edition sold-out in hard-copy version.

Ground Wave Propagation

2014

The Handbook on ground wave propagation is of special interest for communication, particularly broadcasting, at the lower frequencies where the mode has been in use for more than 90 years. It deals with fundamentals and theory, wide-scale considerations and prediction methods used for compatibility assessments and planning procedures. Smaller scale variability, which may be of major importance in assessing the quality of services, is also treated. The topics of measurements and phase are also covered.

Radio Astronomy

2013

The Handbook on Radio Astronomy has been developed by experts of Working Party 7D of ITU-R Study Group 7 (Science Services) that is responsible for radio astronomy. This Handbook is not intended as a source book on radio astronomy, but rather deals with such aspects of radio astronomy that are relevant to frequency coordination as the management of radio spectrum usage in order to minimize interference between radiocommunication services.

ITU-R Special Supplements

Emergency and Disaster relief

2006

Telecommunication is critical at all phases of disaster management. Aspects of radiocommunication services associated with disasters include, inter alia, disaster prediction, detection, alerting and disaster relief. In certain cases, when the 'wired' telecommunication infrastructure is significantly or completely destroyed by a disaster, only radiocommunication services can be employed for disaster relief operation.

Land Mobile (including Wireless Access) - Volume 5: Deployment of Broadband Wireless Access Systems

2011

The overall purpose of the Handbook is to assist in the decision-making process involving planning, engineering and deployment of wireless-based land mobile systems, especially in developing countries. It also provides information that will assist in training engineers and planners in the regulating, planning, engineering and deployment aspects of these systems.

Migration to IMT-2000 Systems - Supplement 1 (Revision 1) of the Handbook on Deployment of IMT-2000 Systems

2011

This revised Supplement expands on the first edition of the ITU Handbook - Deployment of IMT-2000 Systems and updates much of the work that has occurred since the release of the Handbook. It addresses the subject of evolution and migration from current mobile systems towards IMT-2000. ITU-R has developed this work in response to ongoing liaison and interaction with the ITU-D and ITU-T Sectors and sees this material as the natural extension of the information presented in the Handbook.

Land Mobile (including Wireless Access) - Volume 4: Intelligent Transport Systems

2006

Volume 4 of the ITU-R Handbook on Land Mobile (including Wireless Access) provides a summary of the use of wireless communications in intelligent transport systems (ITS), current and under development, around the globe, including architecture, systems, and applications. This is a rapidly developing sector, which is still partly in its infancy.

Land Mobile (including Wireless Access) - Volume 3: Dispatch and Advanced Messaging Systems

2005

The purpose of the Land Mobile Handbook is to assist in the decision-making process involving planning, engineering and deployment of land mobile systems, especially in the developing countries. It should also provide adequate information to assist in training engineers and planners in regulating, planning, engineering and deployment aspects of these systems. Volume 3 on Dispatch and Advanced Messaging Systems provides information on state-of-the-art technology in terrestrial land mobile paging and advanced messaging and dispatch as well as descriptions of typical systems. The technical content is intended for use by administrations and operators in both developing and developed countries.

Deployment of IMT-2000 Systems

2003

This Handbook addresses a variety of issues related to the deployment of IMT-2000 systems, to inform and guide key decision-makers on critical aspects concerning third-generation mobile communication systems, to facilitate decisions on the selection of options and strategies for the introduction of their IMT-2000 networks.

Frequency adaptive communication systems and networks in the MF/HF bands

2002

This Handbook is published to assist planners and decision-makers in the deployment of adaptive MF/HF systems in the fixed service, for both commercial and government users in developed and particularly developing countries. It provides material on current present technological capabilities in the field of adaptive MF/HF communications.

Land Mobile (including Wireless Access) - Volume 2: Principles and Approaches on Evolution to IMT-2000/FPLMTS

1997

This volume of the Handbook provides an overview of principles and approaches to be considered in the evolution of existing and emerging systems towards IMT-2000. IMT-2000 are third generation mobile systems which are scheduled to start service around the year 2000, subject to market considerations.

Guidance for bilateral/multilateral discussions on the use of frequency range 1 350 MHz - 43.5 GHz by fixed service systems
2015

This Handbook summarizes the existing technical approaches to resolve compatibility and sharing issues within fixed service stations. The objective is to provide a guide addressing best practices from those administrations already having knowledge and experience in developing such agreements. Examples are provided to facilitate the sharing of fixed service deployed in the neighbouring countries.

HF Broadcasting System Design
1999

This Handbook provides practical and illustrative guidance (even to radio engineers not having been previously exposed to the specific task of HF broadcasting service planning). Considerable effort has been made to meet the expectations of HF broadcasting engineers from the developing world. This publication includes relevant texts from existing ITU-R Recommendations as well as advanced material.

3.1 Regulations

International Telecommunication Regulations - Melbourne - (WATTC-88) Melbourne, 1988

"These Final Acts incorporate International Telecommunication Regulations. The purpose of these Regulations is to establish general principles which relate to the provision and operation of international telecommunication services offered to the public as well as to the underlying international telecommunication transport means used to provide such services. These Regulations are also established with a view to facilitating global interconnection and interoperability of telecommunication facilities and to promoting the harmonious development and efficient operation of technical facilities, as well as the efficiency, usefulness and availability to the public of international telecommunication services."

3.2 ITU-T Recommendations

The ITU-T Recommendations developed by the ITU Telecommunication Standardization Sector are standards that define how telecommunication networks operate and interwork. They are based on studies on technical, operating and tariff questions and serve to standardize telecommunications on a worldwide scale. Although non-binding, they are widely used because they enable the interconnectivity and interoperability of networks and the provision of worldwide telecommunication services. At present, more than 4000 ITU-T Recommendations on some 140 000 pages are in force on topics from service definition to network architecture and security, and from dial-up modems and IP-related issues to Gbit/s optical transmission systems, next-generation networks (NGN), Internet of Things and cloud computing.

ITU-T Recommendations are made available individually as soon as they are prepared in ITU-T Study Groups and approved by ITU-T Members. Some Recommendations include electronic attachments that can also be downloaded for free either zipped with the Recommendation or from the ITU website. New and revised ITU T Recommendations are announced through the ITU News magazine, email notifications and the List of ITU-T Recommendations on the ITU website, which can be found at <http://www.itu.int/ITU-T/recommendations/index.aspx>. Most recommendations are available for free download but can also be bought on DVD-ROM.

<i>Series</i>	<i>Subject area</i>
A	Organization of the work of ITU-T
D	Tariff and accounting principles and international telecommunication/ICT economic and policy issues
E	Overall network operation, telephone service, service operation and human factors
F	Non-telephone telecommunication services
G	Transmission systems and media, digital systems and networks
H	Audiovisual and multimedia systems
I	Integrated services digital network
J	Cable networks and transmission of television, sound programme and other multimedia signals
K	Protection against interference
L	Environment and ICTs, climate change, e-waste, energy efficiency; construction, installation and protection of cables and other elements of outside plant
M	Telecommunication management, including TMN and network maintenance
N	Maintenance: international sound programme and television transmission circuits
O	Specifications of measuring equipment
P	Telephone transmission quality, telephone installations, local line networks
Q	Switching and signalling, and associated measurements and tests
R	Telegraph transmission
S	Telegraph services terminal equipment
T	Terminals for telematic services
U	Telegraph switching
V	Data communication over the telephone network
X	Data networks, open system communications and security
Y	Global information infrastructure, Internet protocol aspects, next-generation networks, Internet of Things and smart cities
Z	Languages and general software aspects for telecommunication systems

Collection of ITU-T Recommendations and selected Handbooks 2019

This USB key provides vastly improved search tools, including a detailed search-by-content that covers all ITU-T Recommendations in force. Recommendations not yet available in their final edited format are included in their provisional pre-published form. A wide range of electronic attachments are also included and or referenced for direct download from the ITU website. The USB key also includes a searchable collection of selected Handbooks developed by the ITU Telecommunication Sector in fields such as mitigation measures for telecommunication installations and their protection against electromagnetic effects, formal languages, outside plant, network security, quality of service and network planning. This quarterly USB key is available either individually or through a yearly subscription that covers four editions at a discounted rate.

3.3 Handbooks

Network planning

Future networks

2012

This ITU-T Handbook reviews the work to date on future networks. The development of future networks is driven by, on the one hand, the perceived challenges that are faced by networks at the moment and, on the other hand, by the continual development of new applications and technology. The work on future networks is broad in scope and covers not only technological issues but also social, economic and environmental aspects.

Security

Security in Telecommunications and Information Technology

2012

The purpose of the ITU-T Manual on Security in Telecommunications and Information Technology is to provide a broad introduction to the security work of ITU-T. It is directed towards those who have responsibility for, or an interest in, information and communications security and the related standards, and those who simply need to gain a better understanding of ICT security issues and the corresponding ITU-T Recommendations. Please note that the latest version is available for free in PDF <http://www.itu.int/pub/T-TUT-SEC-2015>

Object identifiers (OIDs) and their registration authorities

2010

This Handbook provides information on the use of Object Identifiers (OIDs). It consists of several parts, which will be of interest to different audiences. Part 1 is a general introduction. Part 2 contains historical and background information of a largely tutorial nature. Part 3 provides a full description of the structure of the International OID tree, the high-level arcs and major branches, and the notations and encodings used for expressing OID values. Part 4 is concerned with the practical use of OIDs. It introduces the OID repository and the ITU-T module database. It describes some of the early and current uses of OIDs. Part 5 covers more recent developments, including the International Object Identifier tree, Unicode labels and long arcs. Part 6 discusses the OID Resolution System (ORS) using the Domain Name System (DNS). Part 7 contains instructions on how to obtain an OID for various purposes, and how to manage a sub-authority for allocation of a node to children, including information on actions needed to make use of the ORS. There are several Annexes (of which the most important are probably those concerned with the setting up and operation of a national registration authority) and a bibliography.

Protection against electromagnetic effects

Mitigation measures for telecommunication installations - Part 1 2008

This Handbook describes case studies, supplied by ITU-T Study Group 5 members, of electromagnetic compatibility (EMC) interference problems that have affected telecommunication systems related to emission and immunity, overvoltage and overcurrent, and the solutions to such problems. This handbook also indicates typical sources of interference as well as the solutions that can be used to restore correct service to the system or to avoid any such problems before they manifest themselves. Whilst this handbook does not cover measurement methods or how to measure emissions, overvoltage or overcurrent, as these are covered within other ITU-T Recommendations, it does, through the case studies, suggest how to detect certain problems. The electronic version of part 2 is free of charge. www.itu.int/ITU-T/mitigation/mitigation-p2.html

Earthing and Bonding

2003

This ITU-T Handbook on Earthing and Bonding is for use by engineers designing telecommunication systems, especially those concerned with applying protective measures. It aims to give the user a background to various terms used within the telecommunication and power industry regarding earthing and bonding of equipment and structures (Chapter 1) in various parts of the world. The concepts of earthing and bonding are described (Chapter 2) together with how to implement such methods (Chapters 3 and 4), detailing why these are necessary and what the results may be if they are not performed correctly. The final section of the handbook shows how to evaluate and maintain the effectiveness/quality of the earthing systems and bonding networks thus created.

Directives concerning the protection of telecommunication lines against harmful effects from electric power and electrified railway lines - Volume VI: Danger, damage and disturbance

2008

"These Directives describe the danger to telecommunication system workers and users and damage to equipment as well as the interference to transmission of information that may occur as a result of the proximity of telecommunication system installations to electric power and electrified railway installations. It also describes the conditions that may result in danger to telecommunication system workers and users or damage to equipment. It must be emphasized that although the possibility of danger may exist, the probability of damage to equipment is small and the likelihood of injury is very remote. In addition, it states the conditions that may result in interference to the transmission of information because of the influence of electrical power and electrified railway installations. The likelihood of transmission degradation is significantly increased by such factors as exposure length, earth return currents, harmonic content of power current, cable shielding and longitudinal balance."

Directives concerning the protection of telecommunication lines against harmful effects from electric power and electrified railway lines - Volume V: Inducing currents and voltages in power transmission and distribution systems
2008

The Directives provide a comprehensive description of electromagnetic effects due to the close proximity of telecommunication lines to power and electrified railway systems. Such effects may result in danger to personnel, damage to telecommunication equipment, deterioration of telecommunication transmission quality or disturbance of signalling. Volume V: "Inducing currents and voltages in power transmission and distribution systems" describes balanced and unbalanced power systems in normal operation and under fault conditions.

Directives concerning the protection of telecommunication lines against harmful effects from electric power and electrified railway lines - Volume II: Calculating induced voltages and currents in practical cases
1999

The Directives provide a comprehensive description of electromagnetic effects due to the close proximity of telecommunication lines to power and electrified railway systems. Such effects may result in danger to personnel, damage to telecommunication equipment, deterioration of telecommunication transmission quality or to disturbance of signalling. Volume II - Calculating induced voltages and currents in practical cases - describes the methods for evaluating voltages and currents resulting from capacitive, inductive and conductive coupling in a variety of commonly-encountered situations.

Implementation guidelines

Testing of next generation networks
2011

This Handbook describes the general approach to testing of next generation networks (NGNs). Its goal is to assist administrations and operators in the implementation of testing as a method to verify network and services development strategies, but it can be used by vendors as well. It also discusses interoperability problems that could appear during network or service implementation.

Optical Transport Networks from TDM to Packet

2010

This Handbook discusses the technologies covered by ITU-T Recommendations related to Synchronous Digital Hierarchy (SDH), Optical Transport Network (OTN) and Ethernet over Transport (EoT). Each chapter of this Handbook is dedicated to a specific aspect (architecture, multiplexing hierarchy, protection, synchronization, etc.) of SDH, OTN and EoT optical transport networks. Plesiochronous Digital Hierarchy networks, which are at present considered obsolete, and Multiprotocol Label Switching - Transport Profile, which is at a preliminary stage of standardization, are only mentioned in the Preface. Finally, the last chapter of the Handbook discusses automatically switched optical networks (ASON), based on the control planes introduced in addition to transport planes and management planes.

DSL story

2010

This Handbook provides an overview of the 18 ITU-T Recommendations dealing with the xDSL technology published as of the end of 2009. After a brief introduction of the xDSL technology, the xDSL Recommendations are grouped into nine categories: HDSL and SHDSL, five ADSL (G.992.2, splitterless ADSL, ADSL2 reach extended, splitterless ADSL2 and ADSL2plus) and two VDSL (VDSL1 and VDSL2). Operations and signalling principles of these nine families of xDSL systems are presented, emphasizing the commonalities.

Protection of Telecommunication Buildings from Fire

2002

In a telephone building, the losses from damage caused by fire not only affect the persons and property directly involved in the calamity, but are felt throughout the population due to the effects of the service breakdown and the consequent loss of earnings from the service provider point of view. Moreover, the amount of information and services available to the customers is so high, nowadays, that equipment, buildings, infrastructures and installations need to be protected from damage due to calamities, including fire. This Handbook is specific to the prevention of damage and the protection of telecommunication buildings from fire.

Marinized Terrestrial Cables

2002

The use of underwater optical cables, considered as coming under the heading of terrestrial links, has dramatically increased in recent years. This Handbook describes the characteristics, including the installation methods and testing, of a particular type of underwater cable known as marinized terrestrial cable (MTC), which, based on a conventional multiple fibre terrestrial cable core, is protected to withstand the shallow water environment and designed for specific repeaterless applications.

Application of Computers and Microprocessors to the Construction, Installation and Protection of Telecommunication Cables

1999

The first edition of this Handbook was published in 1994. Due to the rapid development of technologies, a second edition was considered useful to include new applications for computers and microprocessors, taking into account that many countries are adopting such devices and equipment. Outside plant occupies a wide area which requires a large amount of investment and a huge amount of work on design, construction, installation and protection, especially considering the new telecommunication services now available and the future role of access networks.

Proceedings of ITU Kaleidoscope 2017: Challenges for a data-driven society

2017

Data is becoming the key to smart governance, supporting the delivery of citizen-centric public services. Data-driven insight will enable efficiency gains in every industry sector. Advances in data science will continue to unlock major breakthroughs in research. We saw all of these possibilities in the papers presented at Kaleidoscope 2017: Challenges for a data-driven society. The Kaleidoscope 2017 Technical Programme Committee selected 23 papers from the 63 submissions received from 22 countries on the basis of double-blind reviews, with the help of almost 80 international experts. The conference encouraged the development of data-driven applications and services of benefit to society. It highlighted the importance of a shared, integrated data ecosystem in maximizing the collective benefits to be drawn from our fast-growing wealth of data. The Kaleidoscope Conference Proceedings from 2009 onwards can be downloaded free of charge from <http://itu-kaleidoscope.org>

Proceedings of ITU Kaleidoscope 2016: ICTs for a Sustainable World

2016

These Proceedings contain all the papers accepted for the conference ITU Kaleidoscope 2016: "ICTs for a Sustainable World" - Bangkok, Thailand, 14-16 November 2016. The aim of Kaleidoscope conferences is to identify emerging developments in information and communication technologies (ICTs) and, in particular, areas in need of international standards to support the development of successful products and services. The papers at K-2016 presented research into ICT technical developments, innovative ICT applications and policy and regulatory considerations relevant to supporting the achievement of the United Nations Sustainable Development Goals (SDGs). The papers accepted for the conference were reviewed by a panel of over 130 subject matter experts from leading academic and research institutions worldwide.

Proceedings of ITU Kaleidoscope 2015: Trust in the Information Society

2015

These Proceedings contain all the papers accepted for the conference ITU Kaleidoscope 2015: "Trust in the Information Society" - Barcelona, Spain, 9-11 December 2015. The aim of Kaleidoscope conferences is to identify emerging developments in information and communication technologies (ICTs) and, in particular, areas in need of international standards to support the development of successful products and services. The papers at K-2015 analyzed means of building information infrastructures deserving our trust. The event highlighted ideas and research that will help ensure the Information Society's growth in inclusivity and sustainability thanks to its trusted foundations. The papers accepted for the conference were reviewed by a panel of over 150 subject matter experts from leading academic and research institutions worldwide.

Proceedings of ITU Kaleidoscope 2014: Living in a converged world - Impossible without standards?

2014

The Kaleidoscope 2014 conference - Living in a converged world - impossible without standards? - was the sixth in a series of peer-reviewed academic conferences organized by the Telecommunication Standardization Sector of the International Telecommunication Union (ITU-T) with the technical co-sponsorship of the IEEE Communications Society, the Institute of Electronics, Information and Communication Engineers (IEICE) of Japan, and the Popov Society of the Russian Federation. These papers at K-2014 focused on innovative approaches to research on the role of ICT standardization in today's global economy characterized by accelerating convergence of industry sectors and technologies. These conference proceedings include the full text of papers accepted for lecture and poster presentations (after a double-blind review by a panel of over 100 subject matters), as well as three invited papers and a summary of the keynote speeches. The 37 papers reproduced here should provide readers with valuable information relating to this essential field of studies. www.itu-kaleidoscope.org/2014

Proceedings of ITU-T Kaleidoscope 2010: Beyond the Internet? - Innovations for future networks and services - Pune, India, 13-15 December 2010

These Proceedings contain all the papers accepted for the ITU-T Kaleidoscope 2010 ?Beyond the Internet? - Innovations for future networks and services?, Pune, India, 13-15 December 2010. The ITU-T Kaleidoscope academic conferences aim at increasing the dialogue between experts working on the standardization of information and communications technologies (ICTs) and academia; by viewing technologies through a kaleidoscope, these forward-looking events also seek to identify new topics for standardization. The papers at K-2010 focused, from a wide perspective including both technological and socio-economic angles, on evolution of Internet technologies towards future networks and services. The papers accepted for the conference were reviewed by a panel of over 100 subject matter experts from leading academic and research institutions worldwide.

4.2 Statistics and Indicators

ITU hosts the world's most comprehensive collection of ICT data and statistics. It collects, harmonizes and disseminates more than 100 telecommunication and ICT indicators from over 200 economies around the world. ITU regularly publishes analytical reports illustrating the latest trends in the global telecommunication sector. These reports and databases are available online.

Measuring the Information Society Report

2018

The 10th edition of the Measuring the Information Society Report, an annual report published by ITU since 2009, features key ICT data and benchmarking tools to measure the information society. The report presents a quantitative analysis of the information society and highlights new and emerging trends and measurement issues. The 2018 report presents the current state of ICTs using data collected by ITU from its Member States and also feature chapters on ICT skills for the future, revenue and investment in the telecommunication sector and ICT prices. The report once again includes in Volume 2 individual country profiles providing a snapshot of the latest ICT landscape and efforts made to increase ICT access and use. The analytical report is complemented by a series of statistical tables providing country-level data for the indicators included in the ITU ICT Price Basket. Exceptionally, the pdf formats of Volumes 1 and 2 are now available free of charge via the BDT statistical pages Link. Other versions can be purchased below, including the complete zipped set of Volume 1 and Volume 2. This 2018 edition is the final edition of the series.

Measuring the Information Society Report

2017

The 9th edition of the Measuring the Information Society Report, an annual report published by ITU since 2009, features key ICT data and benchmarking tools to measure the information society, including the ICT Development Index (IDI). The report presents a quantitative analysis of the information society and highlights new and emerging trends and measurement issues. The MISR 2017 assesses IDI findings at the global and regional levels and highlights countries that rank at the top of the IDI, as well as those that have improved overall IDI rankings and values most dynamically since IDI 2016. It also uses the findings of the IDI to analyze trends and developments in the digital divide. For the first time the report includes individual country profiles, providing a snapshot of the latest ICT landscape and efforts made to increase ICT access and use. The analytical report is complemented by a series of statistical tables providing country-level data for the indicators included in the IDI. Exceptionally for this edition, the pdf format is available free of charge via the BDT statistical pages on this link. Other versions can be purchased below. Measuring the Information Society Report

2016

The Measuring the Information Society Report, which has been published annually since 2009, features key ICT data and benchmarking tools to measure the information society, including the ICT Development Index (IDI). The IDI 2016 captures the level of ICT developments in 175 economies worldwide and compares progress made since the year 2014. The MISR 2016 assesses IDI findings at the regional level and highlights countries that rank at the top of the IDI and those that have improved their position in the overall IDI rankings most dynamically since 2014. It also uses the findings of the IDI to analyze trends and developments in the digital divide. The report presents 2015 prices for about 160 countries and provide a detailed analysis of mobile-cellular, fixed-broadband and mobile-broadband prices over the period 2008-2015. It highlights the role of ICTs in achieving the Sustainable Development Goals and present the newly agreed SDG indicator framework, including the ICT indicators. The report also includes a chapter looking into new metrics to measure mobile uptake, and a chapter presenting data analyzing Internet use and uptake.

2015

The Measuring the Information Society Report (MISR), which has been published annually since 2009, features key ICT data and benchmarking tools to measure the information society, including the ICT Development Index (IDI). The IDI 2015 captures the level of ICT developments in 167 economies worldwide and compares progress made since the year 2010. The MISR 2015 assesses IDI findings at the regional level and highlights countries that rank at the top of the IDI and those that have improved their position in the overall IDI rankings most dynamically since 2010. The report will feature a review and quantitative assessment of the global ITU goals and targets agreed upon at PP-14 and included in the Connect 2020 Agenda. In addition, the MISR will show the results of the ICT Price Basket (IPB) and present and analyse fixed- and mobile-broadband price data for around 180 economies. The report also includes a chapter looking into recent developments of the Internet of Things (IoT).

Measuring the Information Society

2014

The MIS Report, which has been published annually since 2009, features key ICT data and benchmarking tools to measure the information society, including the ICT Development Index (IDI). The IDI captures the level of ICT developments in 166 economies worldwide and compares progress made during the last year. The MIS 2014 highlights the relationship between ICT development (as measured by the IDI) and the MDGs, a contribution to the ongoing discussions on the potential of ICTs as development enablers. The report includes the results of the ICT Price Basket (IPB) and new mobile-broadband price data for over 140 economies. Price data are analysed to provide insights into the relationship between affordability and income inequality, competition and regulation. The report also looks at new ICT data sources for measurement and examines the possible role of ICT big data for monitoring and development.

Measuring the Information Society

2013

The ITU Measuring the Information Society (MIS) Report, which has been published annually since 2009, features two benchmarking tools to measure the information society: the ICT Development Index (IDI) and the ICT Price Basket (IPB). The IDI captures the level of ICT developments in 157 economies worldwide and compares progress made during the last year. The IPB combines the consumer prices for (fixed and mobile) telephone and Internet broadband services for 161 economies into one measure and compares these across countries, and over time.

Measuring the Information Society

2011

The 2011 edition of Measuring the Information Society features two benchmarking tools to measure the information society: the ICT Development Index (IDI) and the ICT Price Basket (IPB). The IDI captures the level of ICT developments in around 150 economies worldwide and compares progress made during the past two years. The IPB combines fixed telephone, mobile cellular and fixed broadband tariffs for around 160 economies into one measure and compares these across countries and over time. The Report also presents the latest global market trends, takes a closer look at fixed and mobile broadband developments and analyses the digital divide among Internet users. The analytical report is complemented by a series of statistical tables providing country-level data for the indicators included in the two indices. Order below the full report, which includes Annex 5's tariff data, not otherwise available.

Measuring the Information Society

2010

The 2010 edition of Measuring the Information Society features the latest ITU ICT Development Index (IDI), which captures the level of advancement of ICTs in more than 150 countries worldwide and compares progress made between 2002, 2007 and 2008. It also measures the global digital divide and examines how it has developed in recent years, and it discusses the impact of ICTs on socio-economic development. The report also features the ICT Price Basket, which combines fixed, mobile and broadband tariffs one measure and compares 2008 and 2009 data across countries. The analytical report is complemented by a series of statistical tables providing country-level data for the indicators included in the IDI and Price Basket. Please note that ITU also grants free on-line access to the electronic (Adobe® PDF) version of "Measuring the Information Society 2010" (excluding Annex 4).

World Telecommunication/ICT Indicators Database USB Key

23rd Edition, 2019

The World Telecommunication/ICT Indicators database on USB Key and online contains time series data for the years 1960, 1965, 1970 and annually from 1975 to 2018 for more than 180 telecommunication/ICT statistics covering fixed-telephone networks, mobile-cellular telephone subscriptions, quality of service, Internet (including fixed- and mobile-broadband subscription data), traffic, staff, prices, revenue, investment and statistics on ICT access and use by households and individuals. Selected demographic, macroeconomic and broadcasting statistics are also included. For the June release, data for 2018 are available for selected indicators such as fixed-telephone subscriptions, mobile-cellular telephone subscriptions, international Internet bandwidth, fixed (wired)-broadband subscriptions and percentage of individuals using the Internet. Data for over 200 economies are available. Dec 2019 edition of USB key, with more 2018 data, is now available for purchase. Next edition (June 2020) is to be released in July 2020, and will include preliminary 2019 statistics.

Yearbook of Statistics - Telecommunication/ICT Indicators - 2009-2018 2019

This is the 45th and final edition of the Yearbook of Statistics. The data included in the Yearbook was collected and processed by the Telecommunication Development Bureau (BDT) from replies received to ITU questionnaires sent to telecommunication ministries or regulators and national statistics offices. As such, the ITU Yearbook of Statistics provided the most authoritative source of data about the evolution of the telecommunication sector, the availability of ICTs in households and usage of ICTs by individuals. As per Council 2017, the pdf version is available free of charge to Member States from a protected link via secured Member States TIES access. For more information, please contact ITU Sales. As from 2020, the country-by-country pages formerly found in the Yearbook of Statistics will be found exclusively as part of the complete World Telecommunications/ICT Indicators Database, and no longer compiled separately. Yearbook of Statistics 2019 was the final edition in the series.

Measuring digital development - ICT Price Trends 2019
2019

This free report monitors the affordability of ICT services by analysing and comparing price data for mobile-voice services, mobile data and fixed broadband for analysts, telecom operators, policy-makers and economists. It provides analysis in terms of dollar price, exchange-rate adjusted prices and affordability for mobile-voice, mobile and fixed broadband according to internationally agreed baskets for services, including bundled services.

ICT Prices
2017

This report analyses prices of ICT services in more than 150 countries worldwide for the period 2008-2016, to arrive at an understanding of the affordability of ICT services. The trends of four sub-baskets - namely mobile-cellular, fixed-broadband, mobile-broadband accessed via mobile handset with a cap of 500 MB, and mobile-broadband accessed via USB dongle with a cap of 1 GB - are discussed separately, highlighting the variation in prices within and between regions. Prices in this report are expressed in three complementary units: in United States dollars (USD); in international dollars (PPP\$), using purchasing power parity (PPP) conversion factors; and as a percentage of countries' monthly GNI per capita. Note: ICT Prices breakdown is usually found in the ITU Publication Measuring the Information Society, next edition expected December 2018

Handbook for the collection of administrative data on telecommunications/ICT

2020

The ITU Handbook for the Collection of Administrative Data on Telecommunications/ICT is a key reference document for the collection of internationally comparable indicators on telecommunications/ICT based on administrative sources (i.e. supply-side data mainly from operators). The Handbook includes definitions and methodological clarifications for more than 90 internationally agreed indicators, discussed by the Expert Group on Telecommunication/ICT Indicators (EGTI).

African Telecommunication/ICT Indicators 2008: At a crossroads

2008

Prepared for Africa TELECOM 2008 (Cairo, Egypt, 12-15 May 2008), this report is an indispensable reference book of telecommunication facts and figures for the region. The publication provides an overview of market trends, including in the area of fixed, mobile and Internet services. It looks at the availability of ICTs in households and highlights the importance of community access to ICTs. It further looks at the role of different factors that will be crucial in connecting Africa, including regulation and taxes schemes in telecommunications/ICTs. The report includes some 20 regional tables covering key telecommunication/ICT indicators, 55 individual country pages with a five year profile from 2002-2006, and a directory with names of telecommunication ministries, regulators and operators in the region.

Asia-Pacific Telecommunication/ICT Indicators 2008: Broadband in Asia-Pacific: too much, too little ?

2008

Prepared for ITU TELECOM ASIA 2008 (Bangkok, Thailand, 2-5 September 2008), this report is an indispensable reference book of telecommunication/ICT facts and figures for the region. The publication provides an overview of recent market trends, including in the area of fixed, mobile and Internet services. It focuses on broadband developments in the region, including in terms of policies, technologies, competition, access, pricing and applications. The report highlights government policies in the area of broadband that may serve as best practice examples but also looks at and analyzes the region's broadband digital divide and makes a number of conclusions and recommendations. The report includes some 20 regional tables covering key telecommunication/ICT indicators, over 40 individual country pages with a five year profile from 2002 to 2007, and a directory with names of telecommunication ministries, regulators and operators in the region.

Americas Telecommunication Indicators

2005

The 2005 edition of ITU's Americas Telecommunication Indicators has been prepared especially for ITU TELECOM AMERICAS 2005 (Salvador da Bahia, Brazil, 3-6 October 2005). The publication consists of three parts: an analytical overview, regional and country statistics and a directory of telecommunication organizations. An overview of the region's telecommunication sector is the subject of the analytical overview. The statistical section consists of regional indicator tables covering areas such as fixed telephone, mobile, Internet and broadcasting data. Data are for year-end 2003 or 2004, where available. The directory section consists of the names and websites of telecommunication ministries, regulators and facilities-based telephone and cellular operators active in the region.

Manual for Measuring ICT Access and Use by Households and Individuals

This Manual, an update of the 2009 and 2014 publications with the same title, has been prepared to support countries in the production of high quality and internationally comparable data on ICT access and use by households and individuals. The Manual focuses on the Partnership on Measuring ICT for Development's core list of indicators on access to, and use of, ICT by households and individuals. It can be used as basic reference material when preparing, designing and implementing ICT household surveys and also serves as the basis for ITU's training course on ICT household statistics.

4.3 Study Groups

ITU-D study groups develop reports, guidelines and recommendations, based on study Questions approved by world telecommunication development conferences. Information is gathered through surveys, contributions and case studies. ITU-D study group publications are available, free of charge, on the ITU website.

Question 1/1: Policy, regulatory and technical aspects of the migration from existing networks to broadband networks in developing countries, including next-generation networks, m-services, OTT services and the implementation of IPv6

2017

This report examines policy, regulatory, operational, and technical issues associated with the transition from narrowband to broadband networks. The report covers country experiences and best practice guidelines to promote affordable broadband networks, services, and applications, including those that stimulate demand for broadband such as e-education, e-health, m-banking, m-commerce, mobile money transfer, and over-the-top services (OTT).

MEDIA	PRICE CHF	LANGUAGE	ARTICLE	ISBN	PAGES
	Free	E F S A C R			

Question 4/1: Economic policies and methods of determining the costs of services related to national telecommunication/ICT networks including next-generation networks

2017

This report takes stock of different cost models and new methods of charging telecommunication/ICT services in a Next Generation Network (NGN) environment. While services have become more affordable, prices could come down further given the cost reductions associated with provision of these services in an NGN environment. What are the factors preventing this from happening now? The report shares some guidelines on how to promote infrastructure sharing, how to encourage price/tariff reduction to consumers through competition and how access to and use of telecommunication/ICT services can be further stimulated.

ITU-D Reports on Questions and Recommendations - Study Groups 1 and 2

2002 - (SG1 / SG2)

The ITU-D Study Groups were set up in accordance with Resolutions 2 of World Telecommunication Development Conference (WTDC) held in Buenos Aires, Argentina, in 1994). For the period 1998-2002, Study Group 1 is entrusted with the study of eleven Questions in the field of telecommunication development strategies and policies. Study Group 2 is entrusted with the study of seven Questions in the field of development and management of telecommunication services and networks. For this period, in order to respond as quickly as possible to the concerns of developing countries, instead of being approved during the WTDC, the output of each Question is published as and when it is ready.

Final report of ITU-D Focus Group 7: New Technologies for Rural Applications

2001

More than 2.5 billion people (over 40% of the planet's population) live in rural and remote areas of developing countries. Of the small fraction that has any access to telecommunications, voice telephony has been the main service provided. But today, interactive multimedia services, such as e-mail, tele-education and telemedicine, are just as important as voice connectivity. This report looks at technological developments that have the potential to support interactive multimedia services in rural and remote areas.

Spectrum Management System for Developing Countries (SMS4DC)

2017

The Spectrum Management System for Developing Countries (SMS4DC) provides various functionalities for spectrum management activities. Version 5.1 of the software was developed from the contribution of MSIP (Republic of Korea). It contains the revised Article 5 of the Radio Regulations (as per decisions made at WRC-15), as well as further development on data transfer from other databases to the SMS4DC and calculations according to the HCM (European cross-border frequency coordination agreement). The SMS4DC also contains an interface to the spectrum monitoring software of Rohde & Schwarz and of Thales and a general interface for any other monitoring software (TCI's for example). Self-learning training material can be provided upon request.

Spectrum Management System for Developing Countries (SMS4DC)

2015

Version 5.0 of the software contains a general data interface between monitoring software and SMS4DC, additional and revised propagation models based on the latest version of P.452, P.530, P. 1812 and P.1546 + 11343. There is further development of built-in and user specified administrative reports and a general method to import data to SMS4DC. The SMS4DC software is also available in Spanish. Self-learning training material can be provided upon request.

4.5 Least Developed Countries

Small Island Developing States (SIDS) and ICT: Mid-term review of the Samoa pathway

2019

This document reviews progress in access to affordable and modern digital technologies since the 2014 Samoa conference on SIDS. It was prepared as an input document to the September 2019 high-level meeting to review progress made in addressing the priorities of SIDS through implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway. It provides examples to demonstrate progress made, showing how SIDS are using ICTs to help drive sustainable development, and includes a framework for tracking progress towards a universal and affordable Internet.

ITU Guidelines for national emergency telecommunication plans

2020

The Guidelines for National Emergency Telecommunications Plan are a critical tool to assist policy makers and national regulatory authorities to develop a clear, flexible and user-friendly national emergency telecommunications plan with a multi-stakeholder approach, including national policies and procedures as well as governance framework to support and enable the continued use of reliable and resilient ICT networks, services and platforms for disaster management. The guidelines can also be used for developing tailored contingency plans for a specific emergency caused by natural hazards, epidemics or pandemics.

Compendium of ITU'S Work on Emergency Telecommunications

2007

This publication presents, for the first time under one cover, the work being done by ITU's three Sectors (Radiocommunication, Standardization and Telecommunication Development) in the field of emergency telecommunications (or disaster communications). The release of this compendium is timely since disasters are striking with increased frequency and magnitude, resulting in unprecedented loss of human life, not to mention economic disruption and damage. The electronic versions are free of charge as of 2014.

Emergency Telecommunications

2005

This Handbook on Emergency Telecommunications is written to serve as a close companion to those involved in the noble work of providing as well as using telecommunications for disaster mitigation and relief. It simplifies and demystifies the complex technical issues that characterize the fast evolving field of telecommunications, especially in this era of convergence and emergence of next-generation networks. While designed to be simple, the Handbook is comprehensive, compact and contains useful factual information that is concise and organized for easy access, in particular by practitioners.

A Handbook on Internet Protocol (IP)-Based Networks and Related Topics and Issues

2005

The use of Internet Protocol (IP)-based technologies is now a strategic element in the design, development and use of telecommunication networks. Consequently, there is a growing interest in the policy and regulatory issues related to the growth of IP-based networks, such as the Internet, and their convergence with other networks. The ITU project team worked diligently to provide a factual, unbiased account of how IP-based networks, including the Internet, work today, as well as some of the key policy issues associated with the proliferation of these networks and services.

4.7 E-Strategies

Sustainable Development Model (SSDM) Initiative. The advice of the Working Groups support the work of ITU by sharing recommendations within the framework of the SSDM Initiative.

This report provides concrete proposals and hands-on tools for those engaging in deploying rapid response emergency telecommunication for disaster relief, in terms of resource mobilization, training of volunteers and need regulatory measures and guidelines for the development and the smooth trans-border movement of telecommunications equipment in time of emergencies.

Digital transformation and the role of enterprise architecture

2019

Digital Transformation is becoming increasingly a focus of strategic thinking and planning of many public and private organizations. It is about putting the emphasis on how digital services and applications will change and transform citizen's experience and the way we do business in a way that will lead to improvement in quality of life and wellbeing and the attainment of Sustainable Development Goals (SDG). This publication provides an introduction on how digital services and applications are to be shaped and delivered to induce this transformation for government public services and other sectoral areas and the central role of enterprise architecture to reach this.

Digital Identity Roadmap Guide

2018

The Digital Identity Roadmap Guide is a comprehensive set of guidelines for identifying the main aspects that need to be addressed during the design, development and implementation of a National Digital Identity Framework. It is the result of a deeply collaborative multi-stakeholder effort aimed at strengthening the knowledge and expertise of professionals and policy makers working in the field digital identity and, more generally, the digitization of government services. Descriptions of the overarching principles that lay the foundations for designing, developing and implementing a National Digital Identity Framework are included in this guide, which also outlines four critical Focus Areas, lists the main critical success factors and the conflicting principles national leaders and policy makers should be aware of in making certain design decisions, and illustrates a step-by-step approach that could be adopted in managing the National Digital Identity Framework throughout its entire lifecycle. The guide is complemented by a comprehensive set of case studies from countries which have successfully set up National Digital Identity Systems using a range of different approaches, and provides a brief survey of the main technical standards available to date.

e-Agriculture in action: Drones in agriculture

2018

FAO and ITU, together with partners, have been working together in addressing some of the challenges faced in agriculture through the use of sustainable ICTs. One of the latest developments is the increase in the use of small, unmanned aerial vehicles (UAVs), commonly known as drones, for agriculture. Drones have a huge potential in agriculture in supporting evidence-based planning and in spatial data collection. Despite some inherent limitations, these tools and technologies can provide valuable data that can then be used to influence policies and decisions.

eHealth and innovation in women's and children's health: A baseline
review

2014

Improving the health of women and children is a global health imperative, reflected in two of the most compelling Millennium Development Goals which seek specifically to reduce maternal and infant deaths by 2015. This joint report by the World Health Organization (WHO) and the International Telecommunication Union (ITU), based on a 64-country survey, demonstrates - as never before in such detail - the vital role that information and communication technologies (ICTs) and particularly eHealth are playing today in helping achieve those targets. It demonstrates how, every day, eHealth is saving the lives of women, their babies and infants in some of the most vulnerable populations around the world, in a wide variety of innovative ways.

National eHealth Strategy Toolkit

2012

Worldwide, the application of information and communication technologies to support national health-care services is rapidly expanding and increasingly important. This is especially so at a time when all health systems face stringent economic challenges and greater demands to provide more and better care, especially to those most in need. The National eHealth Strategy Toolkit is an expert, practical guide that provides governments, their ministries and stakeholders with a solid foundation and method for the development and implementation of a national eHealth vision, action plan and monitoring framework. All countries, whatever their level of development, can adapt the Toolkit to suit their own circumstances. Representing one of the most significant collaborations in recent years between the World Health Organization and the International Telecommunication Union, the Toolkit is a landmark in understanding what eHealth is, what it can do, and why and how it should be applied to health care today.

Understanding cybercrime: Phenomena, challenges and legal response

2014

Cyberattacks are on the rise. The media constantly report about data breaches and increasingly sophisticated cybercrime. Even governments are affected. At the same time, it is obvious that technology alone cannot solve the problem. What can countries do? Which issues can be addressed by policies and legislation? How to draft a good law? The report assists countries in understanding what cybercrime is about, what the challenges are in fighting such crime and supports them in drafting policies and laws.

4.8 Publications on ICT Regulation, Economics and Finance

Trends in Telecommunication Reform Series

Trends in Telecommunication Reform 2016: Regulatory Incentives to Achieve Digital Opportunities

2016

The annual Trends in Telecommunication Reform publications are a key part of the dialogue with the world's information and communications technology (ICT) policy-makers and regulators in an increasingly converged digital environment. Under the overarching theme "Regulatory incentives to achieve digital opportunities", the 16th edition of Trends explores topical issues regulators need to address to ensure that citizens can benefit from the social and economic opportunities brought about by the digital economy. For digital opportunities to fully materialize, an adaptive, consultative and innovative approach to ICT policy and regulation is more than ever necessary. The thematic chapters, drawing up from discussion papers presented at the 2015 ITU Global Symposium for Regulators, examine investment strategies to foster the deployment of broadband and access to the digital economy, network sharing and co-investment regulation, regulation and the Internet of Things (IoT), interoperability in the digital ecosystem and smart regulation to facilitate m-services and applications uptake and diffusion. As of end-2020, all soft copy versions of this title are now freely available for download, with hard-copies 50% off. Additionally, for a Flipbook view of the complete publication, you are welcome to click [here](#). No version 2017 is expected. Please see instead a new related ITU Publication (and potentially a new series) entitled Global ICT Outlook 2017.

Trends in Telecommunication Reform 2015: Getting ready for the digital economy

2015

Under the overarching theme "Getting ready for the digital economy", the 15th edition of Trends in Telecommunication Reform discusses changing ICT consumer behaviour, consumer empowerment and protection in the digital age. It further explores the opportunities and challenges of big data and what it means from a regulatory perspective; why competition matters. It also attempts to answer whether it is time to rethink spectrum licensing, how to monitor the implementation of broadband plans and what are the new business models driven by digital communications and services. As in previous editions, the publication will feature an in-depth analysis of current market and regulatory trends based on ITU data from one of the world's most comprehensive data platforms, the ICT Eye. See Table of Contents and preview (English only) at: http://www.itu.int/en/publications/Documents/Trends2015-short-version_pass-e374681.pdf

Trends in Telecommunication Reform 2010-2011: Enabling Tomorrow's Digital World

2010/2011

The annual "Trends in Telecommunication Reform" publications are key part of ITU's effort to explore and amplify the wisdom of policy-makers and regulators in the ICT sector. The 11th edition will examine the challenges for regulators to stimulate nationwide broadband deployments through adaptive and targeted regulations and out-of-the-box tools, leading to a new ladder of regulation. With this regard, it is very important for regulators to understand the impact of broadband on and beyond the ICT sector as well as the driving forces of today's and tomorrow's ICT markets, notably the migration from analogue to digital terrestrial broadcasting and the allocation of the digital dividend. For markets to truly thrive, regulators need to prove successful in keeping up with the pace of convergence and integration of ubiquitous networks, in particular through adapting their institutional structure and mandate, adopting cutting-edge best practices and embracing new tools such as innovative dispute resolution techniques. The individual chapters will focus on salient issues such as the changing role of regulators in a digital world and their involvement in non-traditional areas of regulatory intervention, such as ICT climate change and cyberthreats. Last but not least, the Information Society is changing every aspect of our lives, whether in developing or developed countries and it is crucial to leverage the benefits it brings while mitigating the associated threats. What does it all mean for ICT users, but also for regulators and policy makers?

Trends in Telecommunication Reform 2009: Hands-on or hands-off? Stimulating growth through effective ICT regulation

2009

The annual Trends in Telecommunication Reform publications are a key part of ITU's effort to explore and amplify the wisdom of policy-makers and regulators in the ICT sector. The 10th edition will look at the delicate balance that regulators need to strike in order to operate between the hands-on and the hands-off approach to regulation. This balance is required to meet the expectations of key ICT stakeholders and is critical to stimulating growth in a converged environment. The blurring of boundaries between the once separate telecoms, Internet, broadcasting and media worlds is bringing new players to the arena, driving new opportunities and challenges. At the same time, regulatory authorities more than ever have a key role to play in fostering a safe and healthy ICT sector while meeting social goals, especially in a time of economic and financial uncertainty.

Trends in Telecommunication Reform 2008: Six Degrees of Sharing 2008

Many developing countries are preparing for a second wave of regulatory reform designed to enable them to harness the promise of new technologies and participate fully in the information society. This report examines a range of innovative sharing strategies regulators can use to speed up the uptake of ICTs and promote widespread, affordable broadband access. This year's Trends focuses on "Six Degrees of Sharing", examining active and passive infrastructure sharing, open access to international capacity, business sharing, end-user sharing and regulatory sharing.

Trends in Telecommunication Reform 2007: The Road to Next-Generation Networks (NGN) 2007

The 8th edition of Trends in Telecommunication Reform will examine the regulatory challenges and opportunities of Next-Generation Networks (NGN). This report is designed to provide regulators and policy makers with an understanding of the emerging NGN world, with a special focus on developing countries. It will examine NGN technologies and their regulatory implications, fixed mobile convergence (FMC), universal access, interconnection-both domestic and international, consumer protection and an NGN enabling environment.

Trends in Telecommunication Reform 2006: Regulating in the broadband world

2006

The 7th edition of Trends in Telecommunication Reform examines the regulatory challenges and opportunities of enabling ICT development. The report provides regulators with tools they can use to promote effective and innovative development and use of ICTs in a competitive environment. This report provides an overview of developments in the ICT sector, specifically focusing on broadband, its advent, the technologies, the role of the regulator in broadband development, broadband spectrum management, voice over IP (VoIP) regulation, international efforts to combat spam (including a model law and enforceable code of conduct), and identifies best practices. The report is structured into eight chapters.

Trends in Telecommunication Reform 2004: Licensing in an Era of Convergence

2004-2005

The sixth edition of Trends in Telecommunication Reform examines the various licensing options in the ICT sector to provide regulators with tools they can use to promote effective competition in a converging environment. The report provides an overview of licensing practices around the world and the rationale for licensing; identifies new trends such as unified licences; provides options; raises transition issues to be considered in moving from one regime to another; evaluates traditional licensing models; addresses scarce resources such as spectrum; and identifies best practices. The report is structured into eight chapters.

Trends in Telecommunication Reform 2003: Promoting Universal Access to ICTs - Practical tools for regulators

2003

The fifth edition of Trends in Telecommunication Reform explores the tools regulators can use to promote universal access/service. The report provides an overview of universal access/service, the role of sector reform, creation and operation of a universal service fund, the role of minimum subsidy auction, how consumer tariffs and interconnection rates affect the viability of rural universal access/service projects, public access strategies including telecentres, and how regulators can foster entrepreneurial solutions to rural access. The report is structured into eight chapters.

Trends in Telecommunication Reform 2002: Effective Regulation

2002

The fourth edition of Trends in Telecommunication Reform is dedicated to the theme of effective and independent regulation. Since the beginning of the 1990s, the number of regulatory institutions has increased from 13 to more than 110, with many of them having been created in the past five years. But merely creating a regulatory body without empowering it to be effective is not enough. The report looks at the need for regulators; the process of creating a regulator; definitions of independence; why effectiveness may be more important than independence; powers and functions of the regulator; transparency in the decision-making process; organizational structure and finance issues. It is structured into nine chapters.

Trends in Telecommunication Reform 2000-2001: Interconnection Regulation

2001

The third edition of Trends in Telecommunication Reform includes one chapter reviewing global trends in market reform, and seven chapters exploring the key regulatory issue of interconnection. The seven interconnection chapters cover the importance of interconnection, regulatory and technical issues, economic issues in interconnection, network unbundling, interconnection with mobile networks, Internet interconnection and international interconnection.

Trends in Telecommunication Reform: Country Profiles

2000

This CD-ROM provides key regulatory information for each ITU Member State (up to 2000). The information is accessible by country and by region. This interactive tool contains information on the institutional framework, regulatory and policy-making bodies and regulatory issues such as ownership, liberalization, licensing, universal service, and interconnection.

Trends in Telecommunication Reform "Convergence and Regulation"

1999

The second edition of Trends in Telecommunication Reform focuses on the regulation of multimedia services. The report examines eight themes: Institutional Framework, Ownership, Liberalization, Licensing, Universal access, Interconnection, Price regulation and Numbering. Each chapter addresses overall reforms on that subject and looks, in particular, at Internet and other convergence-related issues. English: Out of print (pdf available).

General Trends in Telecommunication Reform "World": Volume I

Volume I

The report provides an overview of the telecommunication regulatory reforms and trends worldwide. Specific regulatory issues are analyzed and compared by region. This report comprises six chapters. The first chapter is dedicated to a general worldwide overview of regulatory trends. Chapters 2-6 address each region (Africa, Americas, Arab States, Asia-Pacific and Europe). All six chapters are focused on new legislation, the rise of regulatory agencies, ownership reforms, competition trends, regulatory matters and regional and international cooperation.

Publications on Economics & Finance

The impact of policies, regulation, and institutions on ICT sector performance

2021

This study shows that ICT regulation has had a measurable impact on the growth of global ICT markets over the past decade. The analysis uses econometric modelling to pinpoint the impact of the regulatory and institutional frameworks on the performance of the ICT sector and its contribution to national economies. The modelling has allowed to capture fresh insights backed by authoritative data on the evolution of ICT regulation since 2007, the ICT Regulatory Tracker, and a global dataset on ICT markets economics. The new analysis points to regulatory features that can have a multiplier effect on ICT markets and consumer benefits. For the mobile sector, open and collaborative regulatory policies appear to have a strong positive impact on investment. In turn, more investment triggers coverage gains and lower consumer prices, boosts ICT adoption and generates growth in national economies around two years after policy adoption. Policy-makers are encouraged to use this study as an evidence base underpinned by a deeper understanding of the linkages between regulatory and institutional contexts and ICT market outcomes, and of which policies can lead markets, consumers, and economies out of the current crisis.

Costing and Pricing Methodologies in the Digital Economy

2019

In the digital economy, broadband networks are increasingly based on fibre optic cables, 4G and 5G mobile and IP transmission, optimized for data rather than voice traffic. This means that regulators have to establish new costing and pricing approaches for the broadband era. In this brave new world cost models continue to be needed, but their application should be focused on specific economic bottlenecks - essential infrastructure that cannot economically be replicated. Just as importantly, regulators have to make the transition from ex-ante to ex-post market intervention, so that investment and innovation can thrive.

How broadband, digitization and ICT regulation impact the global economy

2020

In 2020 the COVID-19 pandemic has underlined the central importance of ICT to national, regional and global economies. As decision-makers consider where to place investment spend on ICT and the digital ecosystem in the years ahead - and on infrastructure programmes more generally - this report offers important and practical guidance both for developing and developed countries. The report is based on recent high-quality data and global in scope, and offers four clear high-level recommendations. In addition, the report sets out six powerful and concrete steps which will maximize the economic impact of strategic ICT investment decisions, as well as concrete recommendations designed to boost economic impact. As economies worldwide look at ways to reinvent and re-charge themselves, this short powerful report is a must-read for governments, policy-makers, regulators, operators and influencers.

Economic impact of COVID-19 on digital infrastructure

2020

As we look ahead towards global recovery, it will be important for governments, digital policy makers and regulators, and the tech sector to ensure that further actions are based on solid evidence. In this ITU report, leading digital economy experts have put their collective heads together in an attempt to get a clearer look at the economic impact of COVID-19 on the world's digital infrastructure - not just a rear-view mirror look, but a far-sighted view from the driver's seat, too.

**The economic contribution of broadband, digitization and ICT regulation:
Econometric modelling for the ITU Europe region**

2020

This study focuses on the impact of broadband, digital transformation and policy and regulatory frameworks on the growth of markets for digital services in the Europe region. It provides evidence of the importance of regulatory and institutional variables in driving digital growth and further illustrates how broadband technologies combined with effective ICT regulation can positively impact the growth of national economies and prosperity. The outcomes of this regional study may serve as key reference material to illustrate the impact of fixed and mobile broadband on the economy, where the regions stand in terms of digitization and the impact of digitization on GDP. The results from this study could assist European countries in conceptualizing the process of launching evidence-based digital transformation strategies.

Economic contribution of broadband, digitization and ICT regulation: Econometric modelling for Asia-Pacific

2019

ITU published the findings of a global study on the economic contribution of broadband, digitization and ICT regulation in September 2018. Following this report, The Economic contribution of broadband, digitization and ICT regulation: Econometric modelling for Asia and Pacific presents a set of econometric analyses that estimate the contribution of broadband and digital transformation on the economy, as well as the impact of ICT policy and regulations on the development of the digital economy in the Asia and Pacific region. The outcomes of this regional report may serve as key reference material to illustrate the impact of fixed and mobile broadband on the economy, where the regions stand in terms of digitization and the impact of digitization on GDP. This could assist countries in conceptualizing the process of launching evidence-based digital transformation strategies. It also provides evidence of the importance of regulatory and institutional variables in driving digital growth and further illustrates how broadband technologies combined with effective ICT regulation can positively impact the growth of national economies and prosperity.

Trends in Economics and Finance Volume II: Use of Economic Modelling in Telecommunications

2006

In the telecommunication industry, economic modelling techniques such as regression analysis, simulations and linear programming are powerful tools that can aid decision making for governments, regulatory authorities and telecommunication operators. Nevertheless, in many countries such techniques are often under-employed. The aim of this report is to describe the various economic modelling techniques and how they can be used to solve practical problems facing the telecommunication industry: for example how a proposed merger may affect competitive behaviour or how demand and profitability may be affected by a price change.

COSITU Version 1.0 SP2 - Software for the Calculation of Costs, Tariffs and Rates for Telephone Services

2004

Cost-based pricing, in particular calculation of interconnection rates, has been one of the most high-profile challenges facing both operators and regulators. Negotiating tariffs or rates is a delicate matter, whether it is for a new operator entering a liberalized market or a regulator wishing to set affordable tariffs for national calls without compromising competitiveness among operators. Now, ITU's Market, Economics and Finance Unit has released COSITU, a practical tool which automates the calculation of costs, taxes, tariffs and rates. This powerful tool will permit network operators, service providers, regulators and policy-makers in developing countries to efficiently calculate costs, taxes related to trade in international traffic (accounting, settlement and termination rates), interconnection rates between local operators and tariffs for national and international telephone services, both fixed and mobile. COSITU SP2 is a bilingual software package (software on CD-ROM + user manual: English/Spanish and English/French versions).

Investing in Telecommunications and ICTs in Developing Markets: Shifting the Paradigm

2003

Telecommunications and ICTs have become a key infrastructure necessary for human development. As the sector has transformed into one driven by commercial interest, one question begs to be answered: what actions can be taken to stimulate private investment in the sector, particularly in countries and regions where the opportunities are less obvious? This report provides insight into answers to this question by analysing trends, examining risk factors facing potential investors and by identifying specific investment opportunities in developing markets. Finally, the report makes specific recommendations to the various stakeholders on actions that can be taken to 'shift the paradigm' so that investment will be attracted to those markets most in need.

Trends in Economics and Finance Volume I: Cost, Tariff and Interconnection Rates - Calculation Methodology and Application to Case Studies

2001

This publication is aimed in particular at network operators and regulatory authorities in developing countries who do not have very detailed data at their disposal on their costs or on the development of prices in their market. The first part describes a model for the calculation of telephone service costs, tariffs and interconnection taxes. The second part shows how the application of this model in different situations (case studies) allows for the identification of national political demands concerning universal service obligations.

Telecommunication Policies for the Americas (The Blue Book)

2000

This second edition of the Blue Book is the result of continued coordination and collaboration between the ITU-D and CITEI (Inter-American Telecommunications Commission). The Blue Book has been updated to take into account the rapidly changing telecommunication environment. New aspects addressed in this edition include the Internet and WTO. The Blue Book is intended to provide countries of the region with appropriate guidance on telecommunication reforms and restructuring.

Telecommunication Policies for the Arab Region (The Arab Book)

2002

The Arab Book contains guidelines and recommendations for governments of the Arab region embarking on reform of their telecommunication sector. It was elaborated with the active participation of experts from the region's administrations. This second edition acknowledges the important changes that have affected the sector since 1996, year of the publication of the first edition. Since that date, following Jordan's example, eight other countries in the region have established a regulatory authority independent from the incumbent operator. Five of these countries have, in addition, introduced competition in an important segment of their telecommunication market. In addition to the themes presented in the previous edition, the reader will find a summary of the experience of Egypt, Jordan, Mauritania, Morocco and Sudan in the area of sector reform, and a new chapter devoted to recent development of the Internet.

The African Green Paper: Telecommunication Policies for Africa

1996

This publication is the result of collaboration among African experts since the first ITU African Regional Telecommunication Development Conference (1990). The African Green Paper explores specific themes related to the overall restructuring of the telecommunications sector. It comprises eight chapters and is intended to serve as a reference document for decision makers who are contemplating reform of the sector. It was formally approved at the second African Regional Telecommunication Development Conference (Abidjan, 1996).

Guide on Data Collection for the application of the COSITU model

2007

This data collection guide is a follow-up to the COSITU user manual. It provides a methodology to help telecommunication regulators and operators to efficiently calculate costs, taxes related to trade in international traffic, interconnection rates between local operators, and tariffs for national and international telephone services, both fixed and mobile, on the basis of a rigorous cost model.

ITU Thematic Reports

Global ICT Regulatory Outlook 2020 - Pointing the way forward to collaborative regulation

2020

The Global ICT Regulatory Outlook (GIRO) series lays out a broad canvas of how regulation and digital markets are interacting - and advocates for collaborative regulatory reform in delivering meaningful connectivity and inclusive digital markets. The report is both dense, offering deep-dive detail, and high-level - pointing up the headline trends, challenges and opportunities for regulators as ICT broadens out to touch all civic, professional and personal aspects of our lives within the phenomenon we call the digital global economy. In this year's 2020 edition, we share unique, focused research and offer both evidence and practical advice to support regulators embarked on their journey to fifth generation collaborative regulation. The Benchmark of Fifth Generation Collaborative Regulation (G5 Benchmark), based on GSR19 Best Practice Guidelines together with the ICT Regulatory Tracker, serves as a compass for regulators on their journey of digital transformation, helping establish roadmaps towards regulatory excellence and a thriving digital economy. Importantly, this year we revisit golden rules for inclusive digital markets based on a wealth of ITU data from 193 countries over more than a decade. Our research and analysis confirm that good regulation makes a difference - and provides the key to unlocking meaningful, inclusive connectivity across countries at different levels of development and national income. Working with those updated golden rules, we offer a regulatory recipe for accelerated take-up of fixed and mobile broadband markets.

Global ICT Regulatory Outlook

2018

The Global ICT Regulatory Outlook 2018 is the second edition of a landmark ITU series. The Outlook focuses on policy and regulatory trends in the ICT sector and brings together cutting-edge research on various topics. It also explores for the first time regulatory collaboration across the board. The report provides organic analysis based on home-grown data, expertise and analytics. The Global ICT Regulatory Outlook is targeted at a wide audience of ICT professionals, including ICT regulators and ministries, Chief Regulatory Officers, policy advisers and academia. The pdf version is now free of charge. New 2020 edition: mid-April 2020.

Global ICT Regulatory Outlook

2017

This Global ICT Regulatory Outlook 2017 is the first of an annual series of reports tracking market and regulatory trends in the information and communication technologies (ICT) sector and their implications across the economy. Understanding current trends and challenges across ICT markets and regulatory frameworks can help address the gaps and capitalize on unexplored opportunities. This report provides useful insights and a clear, evidence-based perspective to do that. This report is also a key resource on smart, inclusive and forward-looking ICT regulation. Its findings can provide useful guidance in reviewing and upgrading regulatory frameworks for the ICT sector as the basis for the digital economy today and for the future. The report reaches out to the regulatory community worldwide, policy-makers, industry and the ICT community in general. The pdf version is now free of charge. New 2020 edition: mid-April 2020.

Powering the digital economy: Regulatory approaches to securing consumer privacy, trust and security

2018

The report provides an outline of the value and the functioning of the digital economy, as well as requirements and considerations in terms of ICT and privacy regulation. It explores the issues of online privacy, trust and security, and how these influence and drive online data business models and data markets. It further examines the notion of trusted digital identity and what it means in terms of security by providing examples of digital identity systems.

Quality of Service Regulation Manual

2017

Ensuring quality of service (QoS) in this ever-changing environment is increasingly critical. A harmonized and common approach to regulating QoS would enable greater quality prospects irrespective of the locations of the consumer and service provider. This manual refers to different standards and regulatory practices from different regions and countries worldwide noting that each region and each country has its own specificities. It is intended to be used as a guiding tool for telecommunication national regulatory agencies (NRAs) or government ministries in charge of QoS and QoE (quality of experience) parameters and measurements as defined by ITU-T, as well as enforcement mechanisms. It further introduces more hands-on information regarding the QoS and QoE big picture, as well as outlining practical approaches in QoS regulation for telecommunication/ICT services.

Issues in Telecommunications Development Volume II: Reforming the international accounting rate system Part I - Overview Part II - Case Studies

1999

On behalf of the ITU, the Telecommunication Development Bureau has taken on the responsibility of assisting countries as they restructure their telecommunication sectors to meet the challenges of globalization and liberalization. Reports from Seminars/Workshops at which developing country representatives reviewed the moves towards international accounting rate reform and a number of papers dealing with cost calculation methodologies are in Part 1, and in Part 2 there are 11 Country Case Studies.

Reforming the international accounting rate system - 1999

2000

During 1999, ITU's Telecommunication Development Bureau continued to support developing countries' efforts to review telecommunication costs and tariff reform. This addendum to the 1998 Review of 'Reforming the international account rate system' contains the reports of the 1999 series of seminars and contributions from developing countries to the work of the Regional Tariff Groups and Study Group 3. These reports are complemented by three additional case studies.

4.9 Publications on human and institutional capacity building and digital inclusion

Digital Skills Assessment Guidebook

2020

ITU's Digital Skills Assessment Guidebook has been designed to serve as a comprehensive, practical step-by-step tool for national digital skills assessments. The guidebook can be used to determine the existing supply of a digitally skilled cohort at a national level, to assess skills demand from industry and other sectors, to identify skills gaps, and to develop policies to address future digital skills requirements. It is designed for use by policy-makers and other stakeholders, such as partners in the private sector, non-governmental organizations, and academia.

Capacity building in a Changing ICT Environment

Edition 2017

The ITU online publication "Capacity Building in a Changing ICT Environment", which is released annually, puts together scholarly articles with a focus on the human and institutional aspects of capacity building in the telecommunications/ICT sector. It covers a wide range of ICT topics that may affect people and their skills development. The first issue of this publication focuses on mobile technologies for skills development and lifelong learning. It features the work of an international team of experts, tackling the issues in an analytical, critical and conceptual fashion. The articles in this issue explore the increasing power of mobile devices in bringing the benefits of ICTs to more people worldwide. They are a contribution to the current discussions on the educational applications of mobile technologies and their potential to enhance and facilitate lifelong learning and skills development.

Catalogue of ITU publications

General conditions of sales

Prices

The prices quoted in the ITU Catalogue of Publications, as well as in Publication Notices (distributed free of charge and visible on the ITU website at the following address: www.itu.int/publications), are in Swiss francs (CHF) and are subject to change without notice.

Discounts of 15 per cent are granted to ITU Member State Administrations, Sector Members and Associates. A non-cumulative discount of 80 per cent on all Publications is also granted to Member State Administrations of Least Developed Countries (LDCs) and Academia Members, while a non-cumulative discount of 80 per cent is also granted to libraries of educational institutions with respect to Subscription Services and CD-ROM/DVD-ROM Publications only.

Catalogue prices of electronic publications (on CD-ROM, DVD-ROM, USB key and online) are given for single users. For corporations and institutions, multi-user licences are granted taking into account the number of authorized users. Please refer to the corresponding Publication Notices on the web. Please note that the minimum price for a publication bought from the Electronic Bookshop is twenty Swiss francs (CHF 20.-).

Forms of dispatch

The catalogue price includes the cost of dispatch by non-registered economy-class mail or the means of carriage most advantageous to ITU. Dispatch can be requested in other forms: i.e. airmail, DHL, Federal Express, TNT, or diplomatic pouch. If one of these alternative methods is chosen, the dispatch cost will be added to the quote. Clients may choose to provide the ITU with their own valid Fedex/DHL/TNT account number for shipping at his expense. If a freight forwarder is designated by the client, this client assumes all transport charges. The costs of shipping via registered mail have been added to the economy-class costs. Customer may refuse these conditions but, in this case, ITU will not be held responsible for the replacement of any undelivered orders dispatched by mail that has not been registered. Customs duties and other taxes or dues levied on imported goods are not borne by ITU. ITU accepts no responsibility for delay, loss or damage in shipment. Any claim must be made as quickly as possible, and at the latest within six months of dispatch of the publication(s).

Return of publications

Where a publication found to be faulty is returned to ITU, the latter's responsibility shall be limited to replacement of the publication and payment of the costs arising from such replacement. Any publication returned to ITU must reach it within one (1) month from the date of its dispatch to the customer, subject to ITU's prior agreement. A minimum charge of fifty Swiss francs (CHF 50.-) will normally be invoiced to the customer by ITU for return of the publication to stock.

No exchange or refund is available for purchases made directly at the ITU Bookshop.

In the case of electronic publications (CD-ROM, DVD-ROM, USB key and online), these general conditions shall apply, subject to the specific derogation provisions contained in the Licence Agreements. The placing of an order implies full acceptance of these general conditions of sale.

None of the provisions of these general conditions of sale shall be interpreted as constituting a derogation or renunciation of the privileges, immunities and facilities enjoyed by ITU in accordance with the international agreement applicable to it, in particular the Headquarters Agreement concluded with the Swiss Federal Council on 22 July 1971, as well as the Swiss law or any other relevant national legislation.

For further information concerning availability, prices, or purchase, please contact:

International Telecommunication Union
Sales and Customer Service Support
Place des Nations
CH-1211 Geneva 20
Switzerland

Telephones: +41 22 730 6141 (English)
+41 22 730 6142 (Français)
+41 22 730 6143 (Español)

E-mail: sales@itu.int

The bookshop is located on the groundfloor of the Montbrillant Building at ITU Headquarters.

It is open from 08h30 to 12h00 and from 13h30 to 17h00, Monday to Friday.

Methods of payment

All publications ordered from ITU must be paid for in advance. Payments can be made:

- by credit card: American Express, Eurocard/Mastercard, Visa;
- by bank transfer to the UBS Switzerland AG. Account ITU Geneva, IBAN: CH 96 0024 0240 C876 5565 0, BIC (SWIFT): UBSWCHZH80A - Clearing No. 240;
- by cheque made payable to ITU/UIT - Union internationale des télécommunications;
- to the ITU postal cheque account: ITU Geneva, No. 12-50-3 (from within Switzerland);
- by UNESCO coupon.

Payments normally should be made in Swiss francs (CHF). Payments may also be made in other currencies freely convertible into CHF, provided that, when converted by the bank, the price of the service in CHF is covered. ITU does not accept letters of credit.

For faster order processing, we invite you to pre-pay by credit card.

Please note that orders cannot be taken over the telephone. They should be sent in writing.
